Spanning multiple cities and croplands these corridors connect metropolises via high speed superhighways in an effort to make certain strategic regions attractive destinations for private investment As policy makers search for decentralized and market oriented means for the transfer of land from agrarian constituencies to infrastructural promoters and urban developers the reallocation of property control is erupting into volatile land based social conflicts In Shareholder Cities Sai Balakrishnan argues that some of India s most decisive conflicts over its urban future will unfold in the regions along the new economic corridors where electorally strong agrarian propertied classes directly encounter financially powerful incoming urban firms Balakrishnan focuses on the first economic corridor the Mumbai Pune Expressway and the construction of three new cities along it The book derives its title from a current mode of resolving agrarian urban conflicts in which agrarian landowners are being transformed into shareholders in the corridor cities and the distributional implications of these new land transformations Shifting the focus of the study of India s contemporary urbanization away from megacities to these in between corridor regions Balakrishnan explores the production of uneven urban development that unsettles older histories of agrarian capitalism and the emergence of agrarian propertied classes as protagonists in the making of urban real estate markets Shareholder Cities highlights the possibilities for a democratic politics of inclusion in which agrarian urban encounters can create opportunities for previously excluded groups to stake new claims for themselves in the corridor regions

China's Backyard Jason Morris-Jung,2018-05-24 In this multi disciplinary and multi sited volume the

authors challenge reductionist and oversimplifying approaches to understanding China's engagement with Southeast Asia. Productively viewing these interactions through a resource lens, the editor has transcended disciplinary and area studies divides in order to assemble a dynamic and diverse group of scholars with extensive experience across Southeast Asia and in China, all while bringing together perspectives from resource economics, policy analysis, international relations, human geography, political ecology, history, sociology, and anthropology. The result is an important collection that not only offers empirically detailed studies of Chinese energy and resource investments in Southeast Asia but which attends to the complex and often ambivalent ways in which such investments have become both a source of anxiety and aspiration for different stakeholders in the region.

Sustainable Energy Resources and Economics in Iceland and Greenland Helga

Kristjánsdóttir, 2015-05-06 This book provides fascinating examples of the ways renewable and sustainable energy can support economic growth, which will be illuminating for academic researchers and students as well as those interested in green investment opportunities. The distinctive glacial, volcanic, and oceanic environments of Iceland and Greenland supply abundant renewable energy resources in the form of hydropower and geothermal energy. As one of the few nations in the world with 100% renewable electricity production, Iceland is a compelling case study of a sustainable energy-driven economy. Consideration of Greenland provides an interesting contrast as its enormous potential for hydropower scale-up has only been minimally harnessed. The variable and fixed cost factors governing further expansion and export of the region's sustainable power via sub-sea cable are detailed.

Law and Regulation of Mobile Payment Systems

Joy Malala, 2017-11-28 Over the last ten years, mobile payment systems have revolutionised banking in some countries in Africa. In Kenya, the introduction of M-Pesa, a new financial services model, has transformed the banking and financial services industry. Giving the unbanked majority access to the financial services market, it has attracted over 18 million subscribers, which is remarkable given that fewer than 4 million people in Kenya have bank accounts. This book addresses the legal and regulatory issues arising out of the introduction of M-Pesa in Kenya and its drive towards financial inclusion. It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools, institutional arrangements, and government decisional processes through the examination, as a whole, of its regulatory capacity. This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion. It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing

the legal and regulatory issues presented by mobile payments The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya **Push Back** Judith Large,2016-12-15 In 2009 after decades of conflict the Sri Lankan government proclaimed the decisive defeat of the Liberation Tamil Tigers of Elam Subsequently the state proved resistant to attempts by the UN and other international bodies to promote post war reconciliation or reform In this incisive new work Judith Large investigates the ways in which the Rajapaksa government was able to subvert international diplomatic efforts as well as exploring the wider context of rising Sinhalese nationalism the attendant growth of discrimination against minorities and efforts by both the diaspora and citizens within Sri Lanka to work towards a positive peace Push Back is vital reading not only for those interested in Sri Lanka but also for those concerned about the wider implications of the conflict for human rights peace making and geopolitics Connecting the Nation Paul Ashton,Tracy Ireland,Jaya Keaney,Alison Wain,Mitchell Whitelaw,2017-01-01 Aviation has played an important part in shaping Australia s culture and history through the course of the twentieth century Australia embraced aviation from its earliest days eagerly responding to its potential to cover a challenging country to bring far flung communities closer and to provide services that could not be delivered any other way Add the romance of pioneer heroes the vital role of aviation in wartime and the capacity to deliver aid to people in need in Australia and beyond and it is clear why aviation is at the heart of Australia s recent history This book aims to set out the major themes that characterise Australia s aviation history for a broad audience and to provide a foundation for a broader discussion and for further research about how aviation transformed Australia Connecting the Nation is a vital and timely introduction to the history of civil aviation in Australia as we prepare for the centenary of civil aviation services in 2020

The Financialisation of Power Sarah Bracking,2016-05-05 The financial crash of 2008 led people all over the world to ask how far financiers are in control of our lives To what extent does what they do with our money affect our everyday lives This book asks whether the crisis and subsequent use of public subsidies to help the international economy recover was a unique event or a symptom of a wider malaise where financiers have effectively usurped the power of governments and are running the political economy themselves The Financialisation of Power in Africa argues that growth is not always a good thing The development of more derivatives and faster financial exchanges are draining businesses of investment capital rather than serving to supply it applying financial logic does not save nature or protect biodiversity and other species This book outlines the concept of financialisation and how it has been used in various ways to explain the post 2008 crisis and global political economy There is a particular focus on these issues in reference to Africa which has a particular dependence on international money It takes the perspective of the modern state exploring how the political economy of development actually works in relation to African governance This book is of interest to students of international development and political economy and is a key source for policy makers interested in African studies and economic development **Handbook on Wealth and the Super-Rich** Iain Hay,Jonathan V Beaverstock,2016-01-29 Fewer than 100 people own and control more
