Vibrant Architecture Rachel Armstrong, 2015-08-17 This book sets out the conditions under which the need for a new approach to the production of architecture in the twenty first century is established where our homes and cities are facing increasing pressures from environmental challenges that are compromising our lives and well being Vibrant architecture embodies a new kind of architectural design practice that explores how lively materials or vibrant matter may be incorporated into our buildings to confer on them some of the properties of living things such as movement growth sensitivity and self repair The theoretical and practical implications of how this may occur are explored through the application of a new group of materials Characteristically these substances possess some of the properties of living systems but may not have the full status of being truly alive They include forms of chemical artificial life such as dynamic droplets or synthetically produced soils As complex systems they are able to communicate directly with the natural world using a shared language of chemistry and so negotiate their continued survival in a restless world Vibrant architecture may create new opportunities for architectural design practice that venture beyond top down form finding programs by enabling architects to co design in partnership with human and nonhuman collectives which result from the production of post natural landscapes Ultimately vibrant architecture may operate as an ecological platform for human development that augments the liveliness of our planet rather than diminishes it

Technology options for engaging respondents in self-administered questionnaires and remote interviewing Sarah L. Cook, Mandy Sha, Joe Murphy, Charles Q. Lau, 2016-03-15 Moving away from in person interviewing and toward self administered questionnaires SAQs reduces costs but also raises questions about data quality Without an interviewer present respondents may lose their engagement with the survey leading to breakoffs and greater measurement error One way to potentially reduce these errors is to leverage new technologies to enhance respondent engagement Another is to use remote interviewers which is more budget friendly than in person interviewers In this paper we describe new technology options to keep respondents engaged with SAQs and harness remote interviewing capabilities mobile data collection short message service and instant messaging video interviewing and virtual worlds Drawing from literature and professional experience we discuss the functioning and implications of these recent technologies for respondent engagement and additional indicators such as respondent burden accuracy and retention This paper serves as a starting point for researchers considering technological options for conducting SAQs or remote interviews to reduce costs while continuing to engage respondents without sacrificing quality
