The purpose of this book is to document the effects of climate change on agriculture in Africa and to discuss strategies for adaptation to hotter weather and less predictable rainfall. These strategies include promoting opportunities for farmers to adopt technologies that produce optimal results in terms of crop yield and income under local agro-ecological and socioeconomic conditions. The focus is on sub-Saharan Africa, an area that is already affected by changing patterns of heat and rainfall. Because of the high prevalence of subsistence farming, food insecurity and extreme poverty in this region, there is a great need for practical adaptation strategies. The book includes empirical research in Ethiopia, Kenya, South Africa, Tanzania and other Sub-Saharan countries, and the conclusion summarizes policy-relevant findings from the chapters. It is aimed at advanced students, researchers, extension and development practitioners and officials of government agencies, NGOs and funding agencies. It also will provide supplementary reading for courses in environment and development and in agricultural economics. **Engendering**

Democracy in Africa Niamh Gaynor, 2022-06-01 This book investigates women's political participation in Africa. Going beyond the formal institutions of electoral politics, it explores a range of spaces where everyday politics take place at national and at local levels. In recent years, there have been significant improvements in the number of women elected to parliament in Africa. However, there is little indication that this is translating into better developmental outcomes, and indeed there is mounting evidence that it could in fact help to bolster some authoritarian regimes. Starting from the premise that politics is a far broader project than securing a seat in national or local legislatures alone, this book explores the opportunities for women's political participation across a number of informal spaces where women and men gather, organise and interact in a more regular and systematic manner. Combining insights from political science, sociology and feminist theory, and drawing on detailed cases from the Congo, Kenya, Malawi, Nigeria and Rwanda, it examines how power in its multiple dimensions circulates across a range of everyday political spaces while drawing attention to the links between domestic gender inequalities and the global political economy. Inviting scholars, practitioners and activists to broaden their focus beyond formal electoral institutions, if they want to support women to become more politically active, this book provides fresh insights into major issues at the heart of African studies, development studies, gender and development, democratisation and international relations. How China is Reshaping the Global Economy

Rhys Jenkins, 2022-06-16 China's growing economic involvement in Sub-Saharan Africa and Latin America has been a source of major controversy. The official Chinese position maintains that the growth of bilateral relations is of mutual benefit and provides a good example of South-South cooperation. Critics, on the other hand, see the economic relations between China and other developing countries as highly unequal, with most of the benefits accruing to China and a few local elites. They also point to negative socio-economic, political and environmental consequences. *How China is Reshaping the Global Economy: Development Impacts in Africa and Latin America*

throws more light on these controversies through a comparative study of China's impact on the two regions. It looks not just at bilateral relations between China and the two regions but also analyses the changes in the global economy brought about as a result of the shift in economic activity from North America and Western Europe to Asia. This book looks at the factors which led to rapid economic growth in China and the way in which this has affected global manufacturing commodity markets, the international presence of Chinese companies and financial flows. It examines the different forms of Chinese economic involvement in Sub-Saharan Africa and Latin America, the main drivers and economic, social, political and environmental consequences. It ends with a comparison of the two regions that highlights the importance of different histories and political and institutional contexts in determining the impacts of China. Since the first edition of *How China is Reshaping the Global Economy: Development Impacts in Africa and Latin America*, China's role in the global economy has continued to expand and the Chinese government's foreign policy has become more assertive. The global presence of China has been marked by the expansion of the Belt and Road Initiative to almost 150 countries and the trade war between the US and China as well as increased Western concerns over the activities of major Chinese companies such as Huawei. This new edition documents these changes and their implications for SSA and LAC.

Gender, Unpaid Work and Care in India Ellina Samantroy, Subhalakshmi Nandi, 2022-05-09 This book explores the paradox of women's paid and unpaid work in India. It examines key themes including historical discourses, macroeconomic policies, employment trends, issues of tribal areas, public services and infrastructure, climate change and gendered migration and vulnerability of girl children. It highlights the play of gender norms, resource rights, identities and agency in women's work. Building on feminist theoretical frameworks and empirical analyses from microstudies, the volume offers fresh perspectives for research and policy on women's work in the Global South. A timely intervention, this multidisciplinary book will be useful to scholars and researchers of political economy, labour studies, women's gender studies, public policy, economics, development studies, sociology, South Asian studies and Global South studies. It will interest planners, policymakers, gender advocates, civil society organisations, human rights bodies and international organisations working towards ensuring gender equality and women's rights.
