2014 November Zimsec Examination Paper 2economics:

Making Politics in Zimbabwe's Second Republic Gorden Moyo, Kirk Helliker, 2023-05-16 The book provides a fresh and innovative interpretation of the new government of Zimbabwe led by Emmerson Mnangagwa which emerged in late 2017 after the downfall of Robert Mugabe. It demonstrates the contradictory character of the Mnangagwa government involving both continuities and discontinuities in relation to Mugabe's regime. The temptation amongst Zimbabwean scholars has been to focus on the continuities and to dismiss the significance of any discontinuities notably reform measures. This book adopts an alternative approach by identifying and focusing specifically on the existence of a formative project of the Mnangagwa's Second Republic further analysing its political significance as well as risks and limitations. While doing so the book covers topics such as reform measures reconciliation transitional justice corruption the media agriculture devolution and the debt crisis as well as health and education. Discussing the limitations of these different reform measures the book highlights that any scholarly failure to identify the risks of the project leads to an incomplete understanding of what constitutes the Mnangagwa's Second Republic. The book appeals to students scholars and researchers of Zimbabwean and African studies political science and international relations as well as policymakers interested in a better understanding of political reform processes.

teleological illusions and Eurocentric prejudice but it does pay close attention to the results of policy in more industrialized parts of the world Seeing the contradictions of capitalism for what they are fundamental and enduring may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth linear process or that it would be were certain impediments suddenly removed The authors criticize a wide range of orthodox and heterodox economists especially for their cavalier attitude to evidence Drawing on their own decades of research and policy experience they combine careful use of available evidence from a range of African countries with political economy insights mainly derived from Kalecki Kaldor and Hirschman to make the policy case for specific types of public sector investment
