Environmental Protection and Disaster Risks (EnviroRisks 2024) Nina Dobrinkova,Stefka Fidanova,2024-11-15 This book is a comprehensive collection of extended contributions from the 3rd International Conference on Environmental Protection and Disaster Risks and the 12th Annual CMDR COE Conference on Crisis Management and Disaster Response held in the period June 4-6 2024 in Sofia Bulgaria as a hybrid participation event Environmental protection and disaster risk topics are challenging fields that scientific world is trying to address Earthquakes floods fires droughts blizzards dust storms natural releases of toxic gases and liquids diseases and other environmental variations affect hundreds of millions of people each year Many disaster events are triggered by human activities Dealing with these problems requires a multidisciplinary scientific approach Actions in these directions are taken more and more in the recent years by political bodies NGOs and scientific groups trying to find sustainable solutions for the future generations Every point of view matters when it comes to our global home The Planet Earth This book presents recent advances in the topics disaster management natural hazards risk reduction and building resilience climate change challenges and security implications resilience and business continuity management high performance computing modeling and simulations GIS for environmental monitoring and artificial intelligence The book is focused on important large scale applications like environmental and climate modeling computational optimizations and algorithms for specific hazard situations analyses *Asymmetric Crisis in Europe and*

Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE

Central Bank Balance Sheet Policies and Spillovers to Emerging Markets Mr.Manmohan Singh,Haobin Wang,2017-07-25 We develop a theoretical model that shows that in the near future the monetary policies of some key central banks in advanced economies AEs will have two dimensions changes in short term policy rates and balance sheet adjustments This will affect emerging market economies EMs especially those with a pegged exchange rate as these EMs primarily use a single monetary policy tool i.e. the short term policy rate We show that changes in policy rates and balance sheet adjustments in AEs may differ in their respective financial spillovers to pegged EMs Thus it will be difficult for EMs to mitigate different types of spillovers with a single monetary policy tool In that context we use the model to show how EMs might use additional tools capital controls and or macro prudential policy to complement their monetary policy and financial stability toolkit We also discuss how balance sheet adjustments that affect long term interest rates may percolate to influence short term interest rates via financial plumbing
