In mathematics algebra plays very important role or we can say that the general math that we use in our day to day life is all about algebra. Algebra, and important math part consists of several number of important topics.

Algebra was first introduced by Greek mathematician after that the branch that deals with operators, operations, variables and their relation has gone through several numbers of changes.

If be split the word algebra in two parts then it will be 'al + jebr', which is an Arabic word that means reunion of broken parts.

When we solve any algebra problem we have to deal with algebraic equations. Equations, plays a very important role in algebraic problems and every problem either is a word problem or any other problem first we have to convert it into equation and then it is solved.

This means conversion in equation form is required every time when we have to get solution of any problem.

Jorrand, V. Sgurev, 2016-01-22 Presenting recent results and ongoing research in Artificial Intelligence this book has a strong emphasis on fundamental questions in several key areas programming languages automated reasoning natural language processing and computer vision AI is at the source of major programming language design efforts Different approaches are described with some of their most significant results languages combining logic and functional styles logic and parallel functional and parallel logic with constraints A central problem in AI is automated reasoning and formal logic is historically at the root of

research in this domain This book presents results in automatic deduction non monotonic reasoning non standard logic machine learning and common sense reasoning Proposals for knowledge representation and knowledge engineering are described and the neural net challenger to classical symbolic AI is also defended Finally AI systems must be able to interact with their environment in a natural and autonomous way Natural language processing is an important part of this Various results are presented in discourse planning natural language parsing understanding and generation The autonomy of a machine for perception of its physical environment is also an AI problem and some research in image processing and computer vision is described

The Evolution of American Educational Technology Paul Saettler, 2004-03-01 The primary purpose of this book is to trace the theoretical methodological foundations of American educational technology It must be emphasized that this work is essentially as history of the process of educational technology rather than of products in the form of devices or media Although media have played an important role in educational technology the reader should not lose sight of the central process which characterizes and underlies the true historical meaning and function of educational technology Moreover the assumption is made that all current theory methodology and practice rests upon the heritage of the past Indeed a common problem in the field has been the failure in many instances to take adequate account of past history in planning for the present or the future A related purpose of this book is to provide a selective survey of research in educational technology as it relates to the American public schools Such research reviews are not intended to be comprehensive but were included because of their historical importance and their relevance in understanding the process of educational technology
