Award Association for Educational Communications Technology AECT A book that explores the problematic connection
between education policy and practice while pointing in the direction of a more fruitful relationship Inside the Black Box of
Classroom Practice is a provocative culminating statement from one of America s most insightful education scholars and
leaders Inside the Black Box of Classroom Practice takes as its starting point a strikingly blunt question With so many major
structural changes in U S public schools over the past century why have classroom practices been largely stable with a
modest blending of new and old teaching practices leaving contemporary classroom lessons familiar to earlier generations of
school goers It is a question that ought to be of paramount interest to all who are interested in school reform in the United
States It is also a question that comes naturally to Larry Cuban whose much admired books have focused on various aspects
of school reform their promises wrong turns partial successes and troubling failures In this book he returns to this territory
but trains his focus on the still baffling fact that policy reforms no matter how ambitious or determined have generally had
little effect on classroom conduct and practice Cuban explores this problem from a variety of angles Several chapters look at
how teachers in responding to major policy initiatives persistently adopt changes and alter particular routine practices while
leaving dominant ways of teaching largely undisturbed Other chapters contrast recent changes in clinical medical practice
with those in classroom teaching comparing the practical effects of varying medical and education policies The book s
concluding chapter distills important insights from these various explorations taking us inside the black box of the book s
title those workings that have repeatedly transformed dramatic policy initiatives into familiar and largely unchanged

s and Joan Herman s The Turnaround Toolkit is written for school leaders who are focused on transforming instruction and
who may be working under significant time constraints to reverse declining student achievement or public perceptions of
school failure Based on the evidence that simply implementing continuous improvement is not enough to close the
achievement gap The Turnaround Toolkit provides a nine step formative evaluation program designed to achieve an
immediate and consistent focus on improving instruction in order to bolster student achievement In a straightforward and
accessible fashion Herman and Winters explain three overarching Turnaround Tasks that frame these steps and the
necessary and sometimes drastic actions that must be taken by school leaders as they use data to strategically choose
implement monitor and revise school interventions A dedicated online toolkit offers numerous worksheets and templates that
support each stage of the process and help school leaders scaffold the work of educators to put an aggressive turnaround
plan into action while a leadership guide at the end of the book provides guidance to turnaround teams and facilitators

The Cost-Effectiveness of 22 Approaches for Raising Student Achievement Stuart S. Yeh,2011-03-01 As a
consequence of the federal No Child Left Behind NCLB law there is tremendous pressure on school principals teachers
school superintendents district staff state departments of education and governors to maximize the increase in student
achievement that is obtained with every dollar of expenditure Currently teachers are forced to rely on extremely inefficient
approaches that take enormous amounts of time both during the school day and throughout the K 12 learning years This is
experienced in terms of the reduced time that is available to teach subjects other than math and reading as schools resort to
double periods of math double periods of reading and enormous amounts of remedial instruction that directly reduce the
time available for other subjects including science art and music In contrast this book suggests that student achievement
may be increased in a way that is not only cost effective in dollar terms but efficient in the sense that it does not rely on
unusual investments in the time required to obtain results The book draws upon a wealth of cost effectiveness data to dispel
common notions about what works in addressing the achievement gap increased expenditure per pupil charter schools
voucher programs increased educational accountability class size reduction comprehensive school reform increased teacher
salaries more selective teacher recruitment the use of value added methods to measure and reward teacher performance the

use of National Board teacher certification to identify high performing teachers and a host of other approaches
