Young Children and Families in the Information Age Kelly L. Heider, Mary Renck Jalongo, 2014-12-05 This edited book presents the most recent theory research and practice on information and technology literacy as it relates to the education of young children Because computers have made it so easy to disseminate information the amount of available information has grown at an exponential rate making it impossible for educators to prepare students for the future without teaching them how to be effective information managers and technology users Although much has been written about information literacy and technology literacy in secondary education there is very little published research about these literacies in early childhood education Recently the National Association for the Education of Young Children and the Fred Rogers Center for Early Learning and Children's Media at Saint Vincent College published a position statement on using technology and interactive media as tools in early childhood programs This statement recommends more research to better understand how young children use and learn with technology and interactive media and also to better understand any short and long term effects Many assume that today's young children are digital natives with a great understanding of technology However children may know how to operate digital technology but be unaware of its dangers or its value to extend their abilities This book argues that information and technology literacy include more than just familiarity with the digital environment They include using technology safely and ethically to demonstrate creativity and innovation to communicate and collaborate to conduct research and use information and to think critically solve problems and make decisions

It's All About You! Marius Van Der Nist, 2020-12-01. We live in a day and age where most people travel through life with no direction or knowledge of what their actual purpose is. Through many trials and tribulations, I found out exactly who I am and my reason for being on earth. Whatever your circumstance, you first need to become content with the person in the mirror. Without him or her by your side, you will stay lost. The mirror needs to become your best friend; otherwise, you will be faced with figuring out life on your own, which can become a very lonely place indeed. Your fears, anger, boredom, and addictions will always make its way to the surface, which creates uncertainty in the core of your being. Every person was once a young child with great big dreams, dreams of being the hero of becoming something or rising to the top and doing daring feats like rescuing the damsel in distress. Even better, every little girl has dreams of being rescued by her prince and swept off on a great adventure, knowing that she is the beauty. For some, they stay as dreams. What happens to those dreams when we grow up? Walk into most churches or large corporations, have a look around, and ask yourself: What does today's man resemble? Then look around you. Most people, especially men, are bored. Life can be full of adventure. We were not placed on earth to figure this out on our own. We need to become crucial influencers and conscious fathers, parents, and mentors to our children, bringing them out of uncertainty into a prosperous life. We need to be ready, right now. Marius Van Der Nist, publisher of numerous international magazines including 220 Triathlon, Triathlete, Sport Image, magazines as well as owner of American Golf Gear. This book is a depiction of his life, the trials and tribulations he faced, aspirations he had as a sportsman and owning businesses, but realized life is all about choices and making them at critical times. I know now life is all about the mind. What the mind believes, the body can achieve.
