McCallum, Eric Connally, Deborah Hughes-Hallett, 2014-11-25 Algebra Form and Function was designed based on the fundamental goal for a student to foster understanding of algebraic structure that is an understanding of how the arrangements of symbols allows us to predict for example the behavior of a function or the number of solutions to an equation Mastering algebraic structure enables students to read algebraic expressions and equations in real life contexts not just manipulate them and to choose which form or which operation will best suit the context It facilitates being able to translate back and forth between symbolic graphical numerical and verbal representations By balancing practice in manipulation and opportunities to see the big picture Algebra Form and Function offers a way for teachers to help students achieve real mastery of algebra **Algebra** L.E. Sigler, 2012-12-06 There is no one best way for an undergraduate student to learn elementary algebra Some kinds of presentations will please some learners and will disenchant others This text presents elementary algebra organized according to some principles of universal algebra Many students find such a presentation of algebra appealing and easier to comprehend The approach emphasizes the similarities and common concepts of the many algebraic structures Such an approach to learning algebra must necessarily have its formal aspects but we have tried in this presentation not to make abstraction a goal in itself We have made great efforts to render the algebraic concepts intuitive and understandable We have not hesitated to deviate from the form of the text when we feel it advisable for the

learner Often the presentations are concrete and may be regarded by some as out of fashion How to present a particular topic is a subjective one dictated by the author's estimation of what the student can best handle at this level We do strive for consistent unifying terminology and notation This means abandoning terms peculiar to one branch of algebra when there is available a more general term applicable to all of algebra We hope that this text is readable by the student as well as the instructor It is a goal of ours to free the instructor for more creative endeavors than reading the text to the students
