International Bestseller Music Learning:

The Routledge International Handbook of the Arts and Education Mike Fleming, Liora Bresler, John O'Toole, 2014-11-27
This International Handbook brings together leading writers on Arts in Education to provide a much needed authoritative guide to the main debates in the field and an informed account of contemporary developments in policy and practice. Providing a detailed overview of key concepts and practical challenges the book combines theoretical insight with specific examples of innovative projects drawing on theoretical, historical and empirical research perspectives to inform understanding. The range of content highlights the breadth of the field addressing such issues as the importance of community arts and partnership as well as school education and providing insight into developments in multiple and connecting arts as well as traditional art forms. Topics such as assessment, creativity, cultural diversity, special needs, the arts in early childhood, adult education, arts based research are all addressed by recognised authorities in each area. The collection of chapters also serves to define the field of arts education, recognising its diversity but highlighting the common elements that provide its identity. The collection addresses generic issues common to all the arts while acknowledging differences and recognising the dangers of over generalisation. It also includes specific chapters on each of the art forms: visual art, dance, drama, literature, music, media arts, providing a cutting edge analysis of key contemporary issues in each subject. Bringing together specially commissioned pieces by a range of international authors, this Handbook will make an important contribution to the field of Arts Education.

Popular Music, Cultural Politics and Music Education in China
Wai-Chung Ho, 2016-12-08
While attention has been paid to various aspects of music education in China to date, no single publication has systematically addressed the complex interplay of sociopolitical transformations underlying the development of popular music and music education in the multilevel culture of China. Before the implementation of the new curriculum reforms in China at the beginning of the twenty first century, there was neither Chinese nor Western popular music in textbook materials. Popular culture had long been prohibited in school music education by China's strong revolutionary orientation which feared spiritual pollution by Western cultures. However, since the early twenty first century education reform has attempted to help students deal with experiences in their daily lives and has officially included learning the canon of popular music in the music curriculum. In relation to this topic, this book analyses how social transformation and cultural politics have affected community relations and the transmission of popular music through school music education. Ho presents music and music education as sociopolitical constructions of nationalism and globalization. Moreover, how popular music is received in

national and global contexts and how it affects the construction of social and musical meanings in school music education as well as the reformation of music education in mainland China is discussed Based on the perspectives of school music teachers and students the findings of the empirical studies in this book address the power and potential use of popular music in school music education as a producer and reproducer of cultural politics in the music curriculum in the mainland
