This important and accessible book identifies the key elements in the quest for best practice in online language teaching. The authors are all international experts who have made significant contributions to the debate about how to exploit the new technologies. They consider online language teaching from three crucial perspectives: design, tools and pedagogy. Their recommendations are such that they can actually be realised in spite of the limitations of today's educational environments. The book demonstrates that the new technologies offer far greater potential for authentic encounters and constructivist learning than even the best classroom simulations. That automated exercise and feedback structures can be individualised and meaningful and that if we have to teach fully by distance, these ventures no longer need to represent impoverished versions of live classes but can engender a strong sense of community. To achieve this we need to understand what elements constitute good design both in technical and pedagogical terms, to think seriously about providing the best feedback possible and to have the courage to take the risks associated with letting go of traditional learner teacher relationships. **Manual of Language Acquisition** Christiane Fäcke, 2014-08-25. It also deals with Romance languages as foreign languages in the world and with language acquisition in some countries of the Romance speaking world.
