With newfound ways of learning, new online environments, and new methods for teaching, students are greatly impacted by the changing face of education. The traditional ways in which students have been served and assisted have changed rapidly, and to make matters even more challenging, students must handle both living in a time of crisis while adapting to swift educational transformations. The dissemination of best practices and maintaining student success during global crises is an area of research that is not only growing in interest but is critical in pandemic times. *Strategies for Student Support During a Global Crisis* reflects on how educational professionals have worked with students during global crises, how serving and teaching students have been impacted, and the best practices for student success in both online education and hybrid formats. The chapters will include topics such as mentoring models, teaching methods, educational technologies, teacher insights, academic support services, and more. This book is ideal for educational professionals, leaders, school administration, teachers, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in the best strategies for supporting students and promoting student success during global crises.
