Advanced Macroeconomics 4th Edition Romer Solution:

Teaching Macroeconomics with Microsoft Excel® Humberto Barreto, 2016-05-23 Humberto Barreto shows professors how to teach macroeconomic models and incorporate data using Microsoft Excel with free files and videos **Economic Dynamics in Discrete Time** Jianjun Miao, 2014-09-12 A unified comprehensive and up to date introduction to the analytical and numerical tools for solving dynamic economic problems This book offers a unified comprehensive and up to date treatment of analytical and numerical tools for solving dynamic economic problems The focus is on introducing recursive methods an important part of every economist's set of tools and readers will learn to apply recursive methods to a variety of dynamic economic problems The book is notable for its combination of theoretical foundations and numerical methods Each topic is first described in theoretical terms with explicit definitions and rigorous proofs numerical methods and computer codes to implement these methods follow Drawing on the latest research the book covers such cutting edge topics as asset price bubbles recursive utility robust control policy analysis in dynamic New Keynesian models with the zero lower bound on interest rates and Bayesian estimation of dynamic stochastic general equilibrium DSGE models The book first introduces the theory of dynamical systems and numerical methods for solving dynamical systems and then discusses the theory and applications of dynamic optimization The book goes on to treat equilibrium analysis covering a variety of core macroeconomic models and such additional topics as recursive utility increasingly used in finance and macroeconomics dynamic games and recursive contracts The book introduces Dynare a widely used software platform for handling a range of economic models readers will learn to use Dynare for numerically solving DSGE models and performing Bayesian estimation of DSGE models Mathematical appendixes present all the necessary mathematical concepts and results Matlab codes used to solve examples are indexed and downloadable from the book's website A solutions manual for students is available for sale from the MIT Press a downloadable instructor's manual is available to qualified instructors **Mathematical Economics** Vasily E. Tarasov, 2020-06-03 This book is devoted to the application of fractional calculus in economics to describe processes with memory and non locality Fractional calculus is a branch of mathematics that studies the properties of differential and integral operators that are characterized by real or complex orders Fractional calculus methods are powerful tools for describing the processes and systems with memory and nonlocality Recently fractional integro differential equations have been used to describe a wide class of economical processes with power law memory and spatial nonlocality Generalizations of basic economic concepts and notions the economic processes with memory were proposed New mathematical models with continuous time are proposed to describe economic dynamics with long memory This book is a collection of articles reflecting the latest mathematical and conceptual developments in mathematical economics with memory and non locality based on applications of fractional calculus **Patentism Replacing Capitalism** Samuel Meng, 2019-05-03 Based on economic knowledge and logical reasoning this book proposes a solution to economic recessions and offers a route for societal change

to end capitalism The author starts with a brief review of the history of economics and then questions and rejects the trend of recent decades that has seen econometrics replace economic theory By reviewing the different schools of economic thought and by examining the limitations of existing theories to business cycles and economic growth the author forms a new theory to explain cyclic economic growth According to this theory economic recessions result from innovation scarcity which in turn results from the flawed design of the patent system The author suggests a new design for the patent system and envisions that the new design would bring about large economic and societal changes Under this new patent system the synergy of the patent and capital markets would ensure that economic recessions could be avoided and that the economy would grow at the highest speed

The Dynamic Macroeconomic Effects of Public Capital Christophe Kamps, 2004-12-22 This book analyzes the dynamic macroeconomic effects of public capital in industrialized countries The issue of whether public capital is productive has received a great deal of recent attention Yet existing empirical analyses have been limited to a small set of countries This book presents a new database that provides internationally comparable capital stock estimates for 22 OECD countries for the 1960-2001 period Building on this database the book estimates the dynamic effects of public capital using a variety of econometric methods The results suggest that public capital is productive in OECD countries on average The theoretical analysis based on a dynamic general equilibrium model shows that the effects of public capital depend crucially on the way the government chooses to finance additional spending

Income Distribution, Economic Growth and Unemployment Joao R. Faria, Jorge Thompson Araujo, Joao G. de Araujo Oliveira, 2025-09-10 This timely book addresses the critical issues of rising inequality and jobless economic growth Presenting cutting edge research on income distribution growth and labor markets in both developed and developing economies it emphasizes the importance of considering these factors together rather than in isolation

Handbook of Research Methods and Applications in Empirical Macroeconomics Nigar Hashimzade, Michael A. Thornton, 2013-01-01 This comprehensive Handbook presents the current state of art in the theory and methodology of macroeconomic data analysis It is intended as a reference for graduate students and researchers interested in exploring new methodologies but can also be employed as a graduate text The Handbook concentrates on the most important issues models and techniques for research in macroeconomics and highlights the core methodologies and their empirical application in an accessible manner Each chapter is largely self contained whilst the comprehensive introduction provides an overview of the key statistical concepts and methods All of the chapters include the essential references for each topic and provide a sound guide for further reading Topics covered include unit roots non linearities and structural breaks time aggregation forecasting the Kalman filter generalised method of moments maximum likelihood and Bayesian estimation vector autoregressive dynamic stochastic general equilibrium and dynamic panel models Presenting the most important models and techniques for empirical research this Handbook will appeal to students researchers and academics working in empirical macro and econometrics

The Development of Africa Olayinka

Akanle, Jìmí Olálékan Adésinà, 2017-10-25 This volume analyses many of the real development challenges confronting the African continent presenting fresh and current objective examinations narratives interpretations and pathways to the continent's development It interrogates and answers established critical current and pragmatic problems confronting Africa today and provides workable pathways out of the development problems so that scholarship policy and practice will be positively impacted This volume adds great depth and extended breadth to the knowledge base on development of Africa It provides excellent resources for academics scholars student policy makers and all those interested in issues affecting Africa's development

Advanced Macroeconomics David Romer, 2001 This text helps lay the groundwork for students to begin doing research in macroeconomics and monetary economics A series of formal models are used to present and analyse important macroeconomic theories The theories are supplemented by examples of relevant empirical work which illustrate the ways that theories can be applied and tested
