Rodriguez, 2014 In *Female Circumcision and Clitoridectomy in the United States* Sarah Rodriguez presents an engaging and surprising history of surgeries on the clitoris revealing how medical views of the female body and female sexuality have changed and in some cases not changed throughout the last century and a half General Outline of Chemical Engineering Activities Tennessee Valley Authority. Sturchio, P.T. Carroll, R.F. Bud, 2012-12-06 This study is an outgrowth of our interest in the history of modern chemistry The paucity of reliable quantitative knowledge about past science was brought home forcibly to us when we undertook a research seminar in the comparative history of modern chemistry in Britain Germany and the United States That seminar which took place at the University of Pennsylvania in the spring of 1975 was paralleled by one devoted to the work of the Annales School The two seminars together catalyzed the attempt to construct historical measures of change in aspects of one science or chemical indicators The present volume displays our results Perhaps our labors may be most usefully compared with the work of those students of medieval science who devote their best efforts to the establishment of texts Only when acceptable texts have been constructed from fragmentary and corrupt sources can scholars move on to the more satisfying business of making history So too in the modern period a necessary preliminary to the full history of any scientific profession is the establishing of reliable quantitative information in the form of statistical series This volume does not offer history Instead it provides certain element indicators that may be useful to individuals interested in the history of American chemistry and chemical industry and suggestive for policy **When to Buy what**, 1964 *Commercial Library Publications List*, 1991 **Commercial Library Program, Publications List** United States.
