American Headway 2 John Soars,Liz Soars,2001 **The Social Construction of Age** Patricia Andrew,2012-01-11

This book explores the social construction of age in the context of EFL in Mexico It is the first book to address the age factor in SLA from a social perspective Based on research carried out at a public university in Mexico it investigates how adults of different ages experience learning a new language and how they enact their age identities as language learners By approaching the topic from a social constructionist perspective and in light of recent work in sociolinguistics and cultural studies it broadens the current second language acquisition focus on age as a fixed biological or chronological variable to encompass its social dimensions What emerges is a more complex and nuanced understanding of age as it intersects with language learning in a way that links it fundamentally to other social phenomena such as gender ethnicity and social class
