Expanding on the topics of the evidence-based TEL workshops series, it provides an open forum for discussing intelligent technologies for learning. In particular, it discusses recommendation mechanisms that enable us to tailor learning to different contexts and people, e.g., by considering their personality and learning analytics that help augment learning opportunities, e.g., by supporting the adaptation of the learning material. In addition to technologies, it covers methods from different fields such as educational psychology or medicine and from diverse communities co-working with people such as making communities and participatory design communities to help create novel TEL opportunities. Further, it describes the use of methods and technologies to investigate and enhance learning for fragile users like children, the elderly, and those with special needs.
