Mott,2013-12-09 Enables readers to apply core principles of environmental engineering to analyze environmental systems Environmental Process Analysis takes a unique approach applying mathematical and numerical process modeling within the context of both natural and engineered environmental systems Readers master core principles of natural and engineering science such as chemical equilibria reaction kinetics ideal and non ideal reactor theory and mass accounting by performing practical real world analyses As they progress through the text readers will have the opportunity to analyze a broad range of environmental processes and systems including water and wastewater treatment surface mining agriculture landfills

subsurface saturated and unsaturated porous media aqueous and marine sediments surface waters and atmospheric moisture The text begins with an examination of water core definitions and a review of important chemical principles It then progressively builds upon this base with applications of Henry's law acid base equilibria and reactions in ideal reactors Finally the text addresses reactions in non ideal reactors and advanced applications of acid base equilibria complexation and solubility dissolution equilibria and oxidation reduction equilibria Several tools are provided to fully engage readers in mastering new concepts and then applying them in practice including Detailed examples that demonstrate the application of concepts and principles Problems at the end of each chapter challenging readers to apply their newfound knowledge to analyze environmental processes and systems MathCAD worksheets that provide a powerful platform for constructing process models Environmental Process Analysis serves as a bridge between introductory environmental engineering textbooks and hands on environmental engineering practice By learning how to mathematically and numerically model environmental processes and systems readers will also come to better understand the underlying connections among the various models concepts and systems
