Advanced Analysis Of Nontraditional Machining:

Advanced Analysis of Nontraditional Machining Hong Hocheng, Hung-Yin Tsai, 2012-12-12 Nontraditional machining utilizes thermal chemical electrical mechanical and optimal sources of energy to bind form and cut materials Advanced Analysis of Nontraditional Machining explains in depth how each of these advanced machining processes work their machining system components and process variables and industrial applications thereby offering advanced knowledge and scientific insight This book also documents the latest and frequently cited research results of a few key nonconventional machining processes for the most concerned topics in industrial applications such as laser machining electrical discharge machining electropolishing of die and mold and wafer processing for integrated circuit manufacturing **Advanced Noncontact Cutting and Joining Technologies** Rasheedat Modupe Mahamood, Esther Titilayo Akinlabi, 2018-03-02 This book illuminates advanced cutting and joining processes what they are used for and the capabilities of these manufacturing techniques especially in micro and nano fabrication The authors illustrate the use of water jets and lasers that can be used to cut highly complex shapes without leaving burrs of heat affected zones as well as friction stir welding processes that were not possible in the past Rounding out their examination the authors describe in detail the use of additive manufacturing for fabrication of micro and nano scale components and the direction of future research Incorporating many examples from industry the book is ideal for professional engineers technicians and fabrication managers in multiple industries Maximizes understanding of advanced manufacturing processes and their capabilities as well as the limitations of each of these technologies Explains use of contactless manufacturing processes in applications such as electronics and sensor fabrication Serves as a ready reference on the latest cutting and joining technologies including those at the micro and nano scale

Proceedings of the 6th International Conference on Industrial Engineering (ICIE 2020) Andrey A. Radionov, Vadim R. Gasiyarov, 2021-02-22 This book highlights recent findings in industrial manufacturing and mechanical engineering and provides an overview of the state of the art in these fields mainly in Russia and Eastern Europe A broad range of topics and issues in modern engineering are discussed including the dynamics of machines and working processes friction wear and lubrication in machines surface transport and technological machines manufacturing engineering of industrial facilities materials engineering metallurgy control systems and their industrial applications industrial mechatronics automation and robotics The book gathers selected papers presented at the 6th International Conference on Industrial Engineering ICIE held in Sochi Russia in May 2020 The authors are experts in various fields of engineering and all papers have been carefully reviewed Given its scope the book will be of interest to a wide readership including mechanical and production engineers lecturers in engineering disciplines and engineering graduates Abrasive Water Jet Machining of Engineering Materials Jagadish, Kapil Gupta, 2019-11-25 This book presents insights in green techniques used in conventional and advanced machining It consists of various experimental case studies conducted by the authors on green machining of difficult to
