American Aces Against The Kamikaze:

American Aces against the Kamikaze Edward M. Young, 2013-09-20 This illustrated history describes the clashes between the US against the hastily created Kamikaze units of the Imperial Japanese Army and Navy Air Forces some of the last large scale aerial engagements of the Pacific War The Japanese High Command realised that the loss of Okinawa would give the Americans a base for the invasion of Japan Its desperate response was to unleash the full force of the Special Attack Units known in the west as the Kamikaze Divine Wind In a series of mass attacks in between April and June 1945 more than 900 Kamikaze aeroplanes were shot down Conventional fighters and bombers accompanied the Special Attack Units as escorts and to add their own weight to the attacks on the US fleet In the air battles leading up to the invasion of Okinawa as well as those that raged over the island in the three months that followed the Japanese lost more than 7 000 aircraft both in the air and on the ground In the course of the fighting 67 Navy 21 Marine and three USAAF pilots became aces As Edward M Young shows in many ways it was an uneven combat and on numerous occasions following these uneven contests American fighter pilots would return from combat having shot down up to six Japanese aeroplanes during a single mission **US Navy**

Ships vs Kamikazes 1944-45 Mark Stille, 2016-09-22 The ineffectiveness of conventional air attacks on US Navy surface ships particularly heavily defended targets like carrier task groups forced the Japanese to re evaluate their tactics in late 1944 The solution they arrived at was simple crash their aircraft into American ships This notion of self sacrifice fit well within the Japanese warrior psyche and proved terrifying to the American sailors subjected to it These tactics brought immediate results and proved effective until the end of the war This book examines this terrifying new way of waging war revealing how the US Navy was forced to adapt its tactics and deploy new weapons to counter the threat posed by kamikaze attacks as well as assessing whether the damage caused to American naval strength by the loss of so many pilots and aircraft actually had a material impact **Kamikazes, Corsairs, and Picket Ships** Robin L. Rielly, 2020-01-10 The untold story of ferocious air and naval combat during the WWII Battle of Okinawa drawn from primary sources and survivor interviews This is the story of an overlooked yet significant aerial and naval battle during the American assault on Okinawa in the spring of 1945 While losses to America's main fleet are well recorded less well known is the terrific battle waged on the radar picket line the fleet's outer defense against Japanese marauders Weaving together the experiences of the ships and their crews drawn from ship and aircraft action reports ship logs and personal interviews historian Robin L Rielly recounts one of the most ferocious air and naval battles in history The US fleet and its accompanying airpower was so massive that the Japanese could only rely on suicide attacks to inflict critical damage Of the 206 ships that served on radar picket duty twenty nine percent were sunk or damaged by Japanese air attacks making theirs the most hazardous naval surface duty in World War II The great losses were largely due to relentless kamikaze attacks but also resulted from the improper use of support gunboats failure to establish land based radar at the earliest possible time the assignment of ships ill equipped for picket duty and as

time went on crew fatigue US air cover during the battle is also described in full as squadrons dashed from their carriers and land bases to intercept the Japanese swarms resulting in constant melees over the fleet

The American Aces Speak: Aces against Japan
Eric M. Hammel, 1992 [The Kamikaze Campaign 1944-45](#) Mark Lardas, 2022-05-26 An illustrated history of how Japan devised and launched a new kind of air campaign in late 1944 the suicidal assaults of the kamikaze units against the

approaching Allied fleets As summer changed to autumn in 1944 Japan was losing the war Still unwilling to surrender Japan's last hope was to try to wear down US resolve enough to reach a negotiated settlement Extraordinary measures seemed necessary and the most extraordinary was the formation of Special Attack Units known to the Allies as the kamikazes The concept of organized suicide squadrons was first raised on June 15 1944 By August formations were being trained These formations were first used in the October 1944 US invasion of the Philippine Islands where they offered some tactical success The program was expanded into a major campaign over the rest of the Pacific War seeing a crescendo during the struggle for Okinawa in April through May 1945 This highly illustrated history examines not just the horrific missions themselves but the decisions behind the kamikaze campaign how it developed and how it became a key part of Japanese strategy Although the attacks started on an almost ad hoc basis the kamikaze soon became a major Japanese policy By the end of the war Japan was manufacturing aircraft specifically for kamikaze missions including a rocket powered manned missile A plan for a massive use of kamikazes to defend the Japanese Home Islands from invasion was developed but never executed because of Japan's surrender in August 1945 Packed with diagrams maps and 3D reconstructions of the attacks this book also assesses the Allied mitigation techniques and strategies and the reasons and the degree to which they were successful **F6F Hellcat**

Attacks of World War II Robin L. Rieley, 2010 This book details more than 400 kamikaze attacks performed by Japanese aircraft manned torpedoes suicide boats and suicide swimmers against US ships during World War II Part One focuses on the traditions development and history Part Two details the kamikaze attacks on ships Appendices list all of the US ships suffering kamikaze attacks Provided by publisher *Hitler's and Hirohito's 'Kamikaze' Flying Bombs* William

Wolf, 2025-11-30 On 1 April 1945 US troops launched the largest amphibious assault of the Pacific War on the heavily defended island of Okinawa Supporting the invasion the USS West Virginia participated in the bombardment of entrenched Japanese defenders That evening a Japanese aircraft launched a Yokosuka MXY 7 Ohka a rocket powered kamikaze plane West Virginia was hit by an Ohka becoming the first ship damaged by such a weapon Twelve days later the USS Mannert L

Able became the first ship sunk by an Ohka The deployment of the Ohka was a desperate measure by Japan as the war turned against them This manned flying bomb evolved from earlier kamikaze tactics However the Germans had also considered similar weapons As early as 1944 figures close to Hitler such as Otto Skorzeny and Hanna Reitsch advocated for kamikaze missions Hitler authorized the creation of the Leonidas Staffel to prepare for these attacks leading to the development of the Messerschmitt Me 328 and Fieseler Fi 103R also known as the Reichenberg Though the Fi 103R began production in October 1944 the changing dynamics of the war rendered it obsolete by the time it was ready for use The project was formally abandoned in March 1945 This book details the development of both the Ohka and Reichenberg Nakajima B5N 'Kate' and B6N 'Jill' Units Mark Chambers,Tony Holmes,2017-06-29 Entering service during the Sino Japanese War the Nakajima B5N code named Kate excelled and went on to achieve surprising and dramatic successes in the Japanese attack on Pearl Harbor It also contributed to the sinking of the US aircraft carriers USS Lexington at the Battle of the Coral Sea USS Yorktown at the Battle of Midway and USS Hornet at the Battle of the Santa Cruz Islands Its replacement the Nakajima B6N Jill while a marked improvement over its illustrious predecessor was never able to achieve its full potential in combat due to advances in Allied aircraft finding itself relegated to the dreaded Kamikaze strikes in the latter part of the war Using previously unpublished photographs as well as colour illustrations this book will cover the history of the Kate and Jill torpedo attack bombers including their design and development as well as the combat highs and lows of the Imperial Japanese Navy s premier torpedo bombers *Greatest Fighter Missions of the Top Navy and Marine Aces of World War II*. Edward H. Sims,1962 Sequel and companion to American aces published in 1958 **The American Military on the Frontier** James P. Tate,1978 Desperate Sunset Mike Yeo,2019-12-24 In a last desperate bid to stave off defeat Japan s High Command launched the terrifying kamikaze attacks This fully illustrated book examines Imperial Japan s last throw of the dice Fully illustrated throughout Desperate Sunset examines the development and evolution of the kamikaze using first hand accounts combat reports and archived histories By the middle of 1944 Imperial Japan s armed forces were in an increasingly desperate situation Its elite air corps had been wiped out over the Solomons in 1942 43 and its navy was a shadow of the force that had attacked Pearl Harbor in 1941 But the Japanese had one last desperate card to play The Japanese High Command decided that the way to inflict maximum damage on the superior enemy forces was to get the poorly trained Japanese pilots to crash their explosive laden aircraft onto their target essentially turning themselves into a guided missile The kamikazes announced themselves in the immediate aftermath of the Leyte Gulf naval battles sinking the USS St Lo and damaging several other ships The zenith of the kamikaze came in the battle of Okinawa which included ten kikusui Floating Chrysanthemum operations that involved up to several hundred aircraft attacking the US fleet East China Sea 1945 Brian Lane Herder,2022-04-26 This study describes the air sea offensive supporting the ground force invasions of Iwo Jima and Okinawa in February and April 1945 which led to the sinking of the Yamato and the onslaught of the Japanese kamikaze The island

invasions of Iwo Jima and Okinawa were the last two major ground campaigns to be initiated during the Pacific War This superbly illustrated volume explores the air sea aspects of these pivotal battles Among the events covered are the death ride of the Japanese battleship Yamato the largest ever built and the mass kamikaze attacks off Iwo Jima and Okinawa as well as the amphibious invasions themselves including the air sea bombardment of the two islands By early 1945 the US Navy had reached an exceptional level of coordination in its amphibious operations and was able to overrun and subdue Japanese territories efficiently Faced with the increasing might of these forces and to prevent further defeat Japan deployed its squadron of kamikaze and attacked many US heavy aircraft carriers and destroyers several were sunk while others were knocked out of the war The book explores the devastating impact they had and considers the contribution of the USAAF and the British Pacific Fleet to the eventual victory of US air and ground forces

Rain of Steel Stephen Moore,2020-09-01 The last Pacific campaign of World War II was the most violent on record Vice Admiral Marc Mitscher s Task Force 58 carriers had conducted air strikes on mainland Japan and supported the Iwo Jima landings but his aviators were sorely tested once the Okinawa campaign commenced on 1 April 1945 Rain of Steel follows Navy and Marine carrier aviators in the desperate air battles to control the kamikazes directed by Vice Admiral Matome Ugaki The latter would unleash ten different Kikusui aerial suicide operations one including a naval force built around the world s most powerful battleship the 71 000 ton Yamato These battles are related largely through the words and experiences of some of the last living U S fighter aces of World War II More than 1 900 kamikaze sorties and thousands more traditional attack aircraft would be launched against the U S Navy s warships radar picket ships and amphibious vessels during the Okinawa campaign In this time Navy Marine and Army Air Force pilots would claim some 2 326 aerial victories The most successful four man fighter division in U S Navy history would be crowned during the fight against Ugaki s kamikazes The Japanese named the campaign tetsu no ame rain of steel often referred to in English as typhoon of steel

Nakajima Ki-49 'Helen' Units George Eleftheriou,2023-05-25 A fully illustrated study of the Nakajima Ki49 Helen the twin engined bomber of the Pacific War from Japanese aviation expert George Eleftheriou The Nakajima Ki 49 Donryu Dragon Eater codenamed Helen by the Allies was a twin engined Japanese bomber designed to undertake daylight attacks without the protection of escort fighters Consequently while it was officially known as the Army Type 100 Heavy Bomber its formidable defensive armament and armour were so heavy that they restricted the Ki 49 to

payloads comparable to those of smaller medium bombers While only five heavy bomber sentai regiments were equipped with the Helen the over 800 Ki 49s built between 1941 and 1944 saw extensive action in Burma Papua New Guinea the Philippines northern India and north Australia In an act of desperation a small number of Helens were even employed unsuccessfully as kamikaze aircraft against US Navy warships operating off the Philippines and Okinawa In this fascinating book George Eleftheriou provides a comprehensive account of the units that saw action flying the Helen based on original Japanese sources Also featuring high quality photographs never published before specially commissioned colour profile artwork official unit histories and veteran accounts this title is a must have for Japanese aircraft enthusiasts **Aces Against Japan** Eric M.
