Sloan, 1972 *War, Nation, Memory* Keith A. Crawford, Stuart J. Foster, 2007-12-01 The Second World War stands as the most devastating and destructive global conflict in human history More than 60 nations representing 1 7 billion people or three quarters of the world s population were consumed by its horror Not surprisingly therefore World War II stands as a landmark episode in history education throughout the world and its prominent place in school history textbooks is almost guaranteed As this book demonstrates however the stories that nations choose to tell their young about World War II do not represent a universally accepted truth about events during the war Rather wartime narratives contained in school textbooks typically are selected to instil in the young a sense of national pride common identify and shared collective memory To understand this process War Nation Memory describes and evaluates school history textbooks from many nations deeply affected by World War II including China France Germany Japan USA and the United Kingdom It critically examines the very different and complex perspectives offered in many nations and analyses the ways in which textbooks commonly serve as instruments of socialisation and in some cases propaganda Above all War Nation

Memory demonstrates that far from containing neutral knowledge history textbooks prove fascinating cultural artefacts consciously shaped and legitimated by powerful ideological cultural and sociopolitical forces dominant in the present

Rethinking America's Past Robert Cohen, Sonia E. Murrow, 2021-11 **Resources in Education**, 2000 The First U.S. History Textbooks Barry Joyce, 2015-08-27 This book analyzes the common narrative residing in American History textbooks published in the first half of the 19th century That story what the author identifies as the American creation or origins narrative is simultaneously examined as both historic and mythic in composition It offers a fresh multidisciplinary perspective on an enduring aspect of these works The book begins with a provocative thesis that proposes the importance of the relationship between myth and history in the creation of America s textbook narrative It ends with a passionate call for a truly inclusive story of who Americans are and what Americans aspire to become The book is organized into three related sections The first section provides the context for the emergence of American History textbooks It analyzes the structure and utility of these school histories within the context of antebellum American society and educational practices The second section is the heart of the book It recounts and scrutinizes the textbook narrative as it tells the story of America s emergence from prehistory through the American Revolution the origins story of America This section identifies the recurring themes and images that together constitute what early educators conceived as a unified cultural narrative Section three examines the sectional bifurcation and eventual re unification of the American History textbook narrative from the 1850s into the early 20th century The book concludes by revisiting the relationship between textbooks the American story and mythic narratives in light of current debates and controversies over textbooks American history curriculum and a common American narrative

America Past and Present (Chapters 1-16) George W Littlefield Professor of American History Robert A Divine, Robert A. Divine, William Smith Mason Professor of American History T H Breen, George M. Frederickson, R. Hal Williams, Ariela J. Gross, H. W. Brands, Distinguished Professor of History Randy Roberts, 2004-03 This book integrates the social and political dimensions of American history into a single story providing students with a complete picture of the scope and complexity of the American past The book not only recounts the events that have shaped the nation s history but also examines the impact of those events on the lives of the American people This book blends the drama of the American experience with insights into the social economic and cultural issues underlying it Back cover Not Another U.S. History Textbook Adam Strube, 2024-01-15 Why on earth would two history nerds use their own free time to write another US history textbook Well that intelligent human is the right question This work breaks from the traditional memorization of who what when where and focuses on why and how The former is popular in schools due to its efficiency in quantification for testing You re either right or wrong about remembering facts But it s so boring that most students turn off their brains once they set foot in the class and that habit continues well into old age if not recognized and corrected Why and how are more subjective therefore harder to grade But with their asking people become re centered in our collective story where they belong Only then can proper

context be understood and criticism and perspective be applied We believe this approach to be the missing link in our education and understanding of current issues norms and discussion points Hopefully after reading this work each reader s critical thinking will activate around all history permanently That will certainly aid humanity s evolution and communication Wait does that mean this book can be categorized as self help Argue away
