Méthod(e)s Jean-Bernard Ouédraogo,2021-08-09 The bilingual French English journal M thod e s founded in 2015 is an African initiative with the objective to enlarge the methodological debates on the Global South The desire for a strong understanding of methodology is to situate it above academic trends thereby placing it in line with a universal history of the sciences Just as calling dominant paradigms into question leaves room for creative opportunities so does the comparison of theoretical approaches and technical models of data collection Questions related to methods are not purely technical or merely philosophical reflections The examination of the method used in scientific investigations necessarily leads us to question the validity and consequences of research results From this point of view the journal M thod e s is not a forum for simple discussions on the mechanics of research but a tool to question social interests influencing academic research and

giving it a political function It is also intended to lead to a more critical look at the creation of theories dealing with the status of individuals and societies in Africa and the Global South Method s aims to bring into question connect and compare the theoretical technical and political foundations of the social sciences as applied to human societies Each contribution is followed by a summary in the respectively other language In order to ensure a broad intellectual reach the editors reserve the right to include articles written in other languages All the abstracts of the papers are also available in Arabic Chinese and Spanish
