Debunking the ideology of marketisation and exposing the half truths that pass for objective reporting Benn and Downs meticulously lay out the evidence that a national system of comprehensive schools delivers the best outcomes This hugely important book should be required reading for each new Education Secretary Caroline Lucas MP Opinions about comprehensive education are often made into easy to swallow sound bites by media and politicians alike and whilst the benefits of a genuinely comprehensive education for all pupils are obvious untruths have unwittingly evolved into hard facts Based on Melissa Benn and Janet Downs work as part of the pioneering Local Schools Network The Truth About Our Schools calls for us to urgently and articulately challenge unquestioned myths about state education Benn and Downs have meticulously built an argument for its still enormously vital role and rigorously challenge assumptions that Comprehensive education has failed Local authorities control and hold back schools Choice competition and markets are the route to educational success Choice will improve education in England the free school model Academies raise standards Teachers don't need qualifications Private schools have the magic DNA Progressive education lowers standards Anyone who thinks that comprehensive education cannot deliver that local authorities are the chief block to improving our school system that competition and markets are the route to educational success and that private schools hold the magic DNA that can simply be transferred to other state schools will have their beliefs shaken by this blisteringly incisive book **Read It Again!** Libby Miller, Liz Rothlein, 1991-09 Educational resource for teachers parents and kids **Using Literature to Learn and Teach Language** Carol Griffiths, 2024-04-30 This accessibly written textbook uses the intrinsic appeal of a story to engage students with language and provides teachers with the background knowledge and the skills to use literature to construct lessons for their classes which integrate all four skills plus language awareness in an enjoyable way Although a number of books and studies have examined the value of using literature to learn language literature remains under represented as a language learning resource The author argues that the accumulated body of literature represents a bottomless pit of potential material just waiting to be recognised and enjoyed From a teacher's point of view a lesson based on a literary work can provide an integrated approach to language development which few other approaches can match A piece of literature can be used to develop all four skills both receptive and productive reading writing listening speaking as well as production skills and language awareness This book will be an essential resource for pre service and in service teachers teacher trainers students and scholars of Applied Linguistics Language Education TESOL and related subjects **Life Skills at Home** Kim Barker, 1998-12 **Harmony-TM** Jyoti Swaroop, Geeta Oberoi, Environment Studies book **Emerging Infectious Diseases**, 2012
