

Animal Bill of Rights

A controversial question that people think about differently is if animals are treated properly or if they should have more rights. In today's world animals are abused and treated badly and not the way they should be treated. Animals are abused, abandoned, and are used by scientists to experiment on and test on. The Animal Bill of Rights includes a set of rights for animals to protect them further than they have been. Having an Animal Bill of Rights does not mean they will have the same rights as a human but it will give them more rights. An Animal Bill of Rights should be implemented in order to protect animals from getting abused, experimented on, and it will help our society by generating more jobs.

If an Animal Bill of Rights was created it would decrease the number of animals abused in the United States. In the article, "Laws that Protect Animals" by Animal Legal Defense Fund, National Headquarters, they informed the audience of the Animal Welfare Act which was supposed to help animals but they are still are not treated the way they should be treated and being abused. The Animal Welfare Act (AWA) is the primary federal animal protection law. The AWA essentially includes animals kept at zoos, used in laboratories for experiments or tests, or animals who are bred and sold like those in puppy mills.

Creating an Animal Bill of Rights would be better known to the people thus causing them to not abuse animals and treat them properly. Also in the article, "A Change in Heart About Animals" by Jeremy Rifkin, he shows in the experiments specifically the one about pigs that was funded by many fast-food restaurants they found out that pigs have been suffering from mental health. The reason for the mental health getting affected is because they easily get depressed when they are trapped in a small area or if they are can play with each other. That shows that pigs have similar traits to humans because if they lack attention to love and support they get depressed and sad. This shows that animals are very similar mentally to humans and animal abuse has a big effect on animals mental health as a result we should create an Animal Bill of Rights to protect animals from bring abused.

Rights of Nature in Liberal Legal Systems and International Law Jasper Mührel, 2024-12-19 Rights of nature are on the rise worldwide having already been recognized in several states especially in Latin America and Asia For the first time in a monograph this book offers answers to the questions of whether and how rights of nature can also be implemented in Western liberal legal systems and in international law It traces how the latter are characterized by a deeply rooted anthropocentrism While at first glance this seems to make the recognition of rights of nature difficult to conceive the book shows that in the 21st century this strong anthropocentrism is neither helpful nor irrevocable and that non anthropocentric approaches can already be found in liberal legal systems and in international law Against the backdrop of the pressing environmental crises of the Anthropocene it offers liberal and international approaches to rights of nature In doing so the book analyzes the compatibility of rights of nature with Western liberal and international law and deals comprehensively with the criticism and potential benefits of rights of nature in order to ultimately provide concrete proposals for their implementation
