Environmentalism of the Rich Peter Dauvergne, 2016-09-23 Global Environmental Politics overviews *The Story of Work* Jan Lucassen, 2021-07-27 The first truly global history of work an upbeat assessment from the age of the hunter gatherer to the present day We work because we have to but also because we like it from hunting gathering over 700 000 years ago to the present era of zoom meetings humans have always worked to make the world around them serve their needs Jan Lucassen provides an inclusive history of humanity's busy labor throughout the ages Spanning China India Africa the Americas and Europe Lucassen looks at the ways in which humanity organizes work in the household the tribe the city and the state He examines how labor is split between men women and children the watershed moment of the invention of money the collective action of workers and at the impact of migration slavery and the idea of leisure From peasant farmers in the first agrarian societies to the precarious existence of today's gig workers this surprising account of both cooperation and subordination at work throws essential light on the opportunities we face today **What Is Global Studies?** Manfred Steger, Amentahru Wahlrab, 2016-11-10 What is Global Studies and how does it relate to globalization Responding to this frequently asked question Manfred B Steger and Amentahru Wahlrab provide the first comprehensive overview of this emerging field Authoritative and accessible this primer speaks to students and instructors interested not only in key theories but also in applied teaching and learning programs designed to educate global citizens to meet the concrete challenges of the twenty first century Linking the influential arguments of major thinkers in Global Studies to their own framework the authors discuss the Four Pillars of Global Studies globalization transdisciplinarity space and time and critical thinking The book with instructive appendix materials will appeal to readers seeking a deeper understanding of Global Studies one of the most popular fields of study in major universities around the world Carbon Societies Peter Wagner, 2024-05-30 The climate crisis is humanmade Its main cause is the burning of fossil fuels To combat climate change we have to understand how we arrived at where we are This book explores the reasons why human societies have embarked on the trajectory of ever increasing use of fossil fuels Population growth desire for freedom from want and profit seeking all played major roles in shaping human history but there has been no inevitable drive towards heating up the atmosphere in the pursuit of social objectives To sustain a growing population more natural resources are required but their use does not need to generate climate change No logic of modernity links freedom with a kind of material abundance that requires the burning of fossil fuels No logic of capital necessarily ties the search for profit to the extraction of fossil resources Examining the critical

junctures in human history when resource regimes changed this book identifies the social problems that were meant to be solved by burning fossil fuels and the power hierarchies that shaped the decisions to use them Wagner argues that the key choices that led to the climate emergency were made relatively recently during the second half of the 20th century they are close enough in time for us to undo the prevailing social logic of fossil fuels By redefining the key problems that humankind is facing and reshaping the existing mechanisms of power we can take the decisive action needed to reduce our dependence on fossil fuels and avert the worst consequences of climate change
