Captured Futures Maarten A. Hajer,Jeroen Oomen,2025-05-14 Environmental politics as we know it cannot deliver Despite all efforts politics is unable to bend the ecological trends Maarten A Hajer and Jeroen Oomen argue that this is because environmental politics is captured This capture doesn t just express itself in lobbying or a lack of political will but in a capture of the imagination we seem unable to imagine futures that are meaningfully different from the present Examining environmental politics as drama reveals how all actors play their particular roles in this capture scientists funnel narrow policy futures through their models activists adopt politically expedient language and policymakers look for safe technologically sound win win solutions All are captured in a regime of ecological modernization that entertains too narrow a solution space For Hajer and Oomen this is cause for concern we have entered a radical age in which persistent policy failure leads to increased suggestions to engage with speculative geoengineering technologies in a desperate attempt to safeguard the future On the other hand they point at the growing societal backlash against environmental policies Yet in the third part of the book discourse and dramaturgical analysis appear as a reason for hope sketching an alternative perspective on

environmental politics It suggests that a new more cultural approach to environmental politics could have more leverage on the societal imagination Combining this with the formulation of new discourses and using alternative dramaturgies of change Captured Futures highlights how to find more effective and more inspiring ideas about how to approach the future and ultimately liberate environmental politics **Climate Change** Great Britain.
