ECAI 2014 T. Schaub, G. Friedrich, B. O'Sullivan, 2014-08 The role of artificial intelligence AI applications in fields as diverse as medicine economics linguistics logical analysis and industry continues to grow in scope and importance AI has become integral to the effective functioning of much of the technical infrastructure we all now take for granted as part of our daily lives This book presents the papers from the 21st biennial European Conference on Artificial Intelligence ECAI 2014 held in Prague Czech Republic in August 2014 The ECAI conference remains Europe's principal opportunity for researchers and practitioners of Artificial Intelligence to gather and to discuss the latest trends and challenges in all subfields of AI as well as to demonstrate innovative applications and uses of advanced AI technology Included here are the 158 long papers and 94 short papers selected for presentation at the conference Many of the papers cover the fields of knowledge representation reasoning and logic as well as agent based and multi agent systems machine learning and data mining The proceedings of PAIS 2014 and the PAIS System Demonstrations are also included in this volume which will be of interest to all those wishing to keep abreast of the latest developments in the field of AI

Adult Responses to Popular Music and Intergenerational Relations in Britain, c. 1955-1975 Gillian A. M. Mitchell, 2019-02-28 Adult Reactions to Popular Music and Inter generational Relations in Britain 1955-1975 challenges stereotypes concerning a post war generation gap exacerbated by rebellion inducing popular music styles by demonstrating the considerable variety which frequently characterized adult responses to the music whilst also highlighting that the impact of the music on inter generational relations was more complex than is often assumed NP Utilizing extensive primary evidence from first person accounts to newspapers television programmes surveys and archive collections the book adopts a thematic approach identifying three key arenas of British society in which adult responses to popular music and the impact of such reactions upon relations between generations seem particularly revealing and significant The book examines in detail the place of popular music within family life and Christian churches and their engagement with popular music particularly within youth clubs It also explores encounters between the worlds of traditional Variety entertainment and popular music while providing broader perspectives on this most dynamic and turbulent of periods

 Targeting Mariagrazia Uguccioni, Mauro Martins Teixeira, Massimo Locati, Alberto Mantovani, 2018-01-11 Inflammation is a
 fundamental protective mechanism and at the same time the driving force of a variety of major diseases in humans Indeed
 acute self resolving inflammation usually plays a positive role for the host as exemplified by infectious diseases where its
 positive role is well established and testified by its perception as innate immunity On the other hand non resolving
 inflammation and consequent chronicization is a key determinant of immunopathology and clinical manifestations of most
 major diseases in humans As a consequence it is increasingly appreciated that the problem with inflammation is not how often

it starts but how often it fails to resolve Appropriate resolution of inflammatory responses which also drives activation of tissue damage repair mechanisms and return of local tissues to homeostasis is a necessary process for ongoing health Interestingly cells sustaining these processes are also key to the proinflammatory responses and the underlying pro resolving molecular pathways are triggered as part of the pro inflammatory response This clearly indicates resolution of inflammation as an active process requiring functional repolarization of inflammatory cells that calls our attention on the underlying molecular mechanisms The increasing number of anti inflammatory drugs best sellers in the pharma market is a clear indication of the relevance of having inflammation under check nonetheless there is still a great need for better acting pharmacological tools for the control of inflammation Indeed the remarkable success of biological drugs targeting proinflammatory cytokines has indicates that tools able to block proinflammatory mediators have promising applications but at the same time has made clear that there are intrinsic limitations to this approach which frequently vanish undermine the activity of single targeting drugs including the well known redundancy of inflammatory mediators Under self limiting conditions inflammation spontaneously resolves in an active process Some cellular and molecular mechanisms involved in inflammation resolution have been uncovered in the recent past and include generation of specific cytokines apoptosis of inflammatory leukocytes lipid mediators macrophage repolarization and others are likely to be revealed in the next future since loss of function mutations of an increasing number of genes results in the development of spontaneous inflammation in experimental animals We argue that pushing for inflammation resolution by exploiting active naturally occurring pro resolving processes may have significant advantages over the attempt to simply push back inflammation by passive blockade of proinflammatory mediators At present the research in the field of inflammation aims at identifying and validates new molecules involved in the resolution of inflammation as a basis for the development of innovative therapeutic strategies in chronic inflammatory and autoimmune diseases This involves the discovery of new natural or synthetic pro resolving molecules from plant and animals and the investigation of endogenous inflammation pro resolving mechanisms including atypical chemokine receptors decoy receptors and microRNA An extensive effort is focused on the regulation by pro resolving agents on two molecular systems of key relevance in inflammation the chemokine system which regulates recruitment permanence and egress of leukocyte in tissues and the Toll Like Receptor TLR IL 1R system which is central for the activation of infiltrating leukocytes
