Shootings and Civilian Armament Alexei Anisin, 2021-11-18 Mass Shootings and Civilian Armament provides the first comprehensive multi methodological analysis of the relationship between mass shootings and firearm purchases as proxied by background checks in the US on national level data from 1999 2020 Since 1994 the number of civilian owned firearms in the US has doubled to around 398 million while the population only grew by 70 million On average mass shootings have occurred once every two weeks over the last decade which is a major factor behind why social scientists have started to ask whether mass shootings play a causative role in civilian decisions to purchase guns Utilizing a multi methodological approach featuring quantitative comparative configurational and qualitative methods this book puts forward a theoretical framework and argues that mass shootings do increase civilian armament but that this repetitious effect is historically contingent asymmetric and non linear Particular types of mass shootings are hypothesized to have driven and continue to bring about increased levels of civilian firearm purchases through different pathways and combinations of variables those that feature high fatality counts arise in areas of cultural importance are ideologically motivated First inquiry into background check data 1999 2020 and data on 213 mass shootings and attempted mass shootings is carried out to find out which shootings as well as controls are significantly correlated with background check increases Second the findings are utilized in a theoretically driven comparative configurational assessment to test if the noted theoretical pathways are associated with the outcome of increased post shooting armament Third the empirical analyses are complimented by three case studies the 2011 Gabrielle Giffords shooting illustrative of the high fatality pathway the 2012 Colorado movie theater shooting illustrative of the cultural pathway and the 2015 Charleston Church shooting illustrative of the ideologically driven pathway Interdisciplinary in nature Mass Shootings and Civilian Armament will not only be of great interest to scholars of Criminology but will also speak to sociologists economists public policy scholars political scientists historians as well as cultural studies and American studies scholars *English for Everyone Practice Book Level 3 Intermediate* DK, 2025-06-05 Take your self study English language
