

Abstract 101.01: Specialized and Generalized Functions in the Brain

The brain is a complex organ that performs a wide range of functions. The functions of the brain can be divided into specialized and generalized functions. Specialized functions are those that are performed by specific areas of the brain, such as language, memory, and motor control. Generalized functions are those that are performed by the entire brain, such as consciousness, attention, and emotion. The brain is a highly adaptable organ that can learn and change throughout its life.
