Vedic Creationism Ashish Dalela, 2008-12 The idea that the universe was created by God often meets hostile opposition from proponents of rationality and science because unlike science that creates empirical laws religious theories seem to make no verifiable predictions But in Vedic Creationism author Ashish K Dalela shows that a personal theistic account of creation given in the Vedas has radical implications for the study of matter and questions of creation including new verifiable predictions based upon a different conception of reality An expansive examination of the meaning of the universe by comparing and contrasting varying philosophical vantages Vedic Creationism covers the journey from Vedic notions on God s personality and conscious mind to the implication these ideas have for the origins of life and the attainment of quantum gravity Dalela relates the ideas in Vedic philosophy with the current state of affairs in modern science including the mind body problem the unification of quantum and relativity theories and the question of evolution and origins of life Presenting new forward looking ideas Vedic Creationism will help put the age old wisdom of Vedas in a modern light and open new areas of dialogue
