Chaney, Ken S. McAllister, Judd Ethan Ruggill, 2009-03-26 The Computer Culture Reader brings together a multi disciplinary group of scholars to probe the underlying structures and overarching implications of the ways in which people and computers collaborate in the production of meaning The contributors navigate the heady and sometimes terrifying atmosphere surrounding the digital revolution in an attempt to take its measure through examinations of community and modes of communication representation information production learning work and play The authors address questions of art reality literacy history heroism commerce crime and death as well as specific technologies ranging from corporate web portals and computer games to social networking applications and virtual museums In all the essayists work around and through the notion that the desire to communicate is at the heart of the digital age and that the opportunity for private and public expression has taken a commanding hold on the modern imagination The contributors argue ultimately that the reference eld for the technological and cultural changes at the root of the digital revolution extends well beyond any specific locality nationality discourse or discipline Consequently this volume advocates for an adaptable perspective that delivers new insights about the robust and fragile relationships between computers and people *Farmer's Weekly* ,1956 **Milwaukee Magazine** ,2006-07 *Popular Photography* ,1999-02 Ebony ,2000-03 EBONY is the flagship magazine of Johnson Publishing Founded in 1945 by John H Johnson it still maintains the highest global circulation of any African American focused magazine Ebony ,1999-11
