Anderson, 2013-12-17 In the late 1990s the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge This book is not a definitive statement about what the new music industry is Rather it is devoted to what this new industry is becoming by examining these practices as experiments dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings In this new economy constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial Finally every element of the industry now must consider a new type of audience the end user and their productive and distributive capacities around which services and musicians must orient their practices and investments Algorithms of Resistance Tiziano Bonini, Emiliano Trer, 2024-02-06 How global workers influencers and activists develop tactics of algorithmic resistance by appropriating and repurposing the same algorithms that control our lives Algorithms are all around us permeating more and more aspects of our daily lives While accounts of platform power tend to come across as bleak and monolithic Algorithms of Resistance shows how people can resist algorithms across a variety of domains Drawing from rich ethnographic materials and perspectives from both the Global North and South authors Tiziano Bonini and Emiliano Trer explore how people appropriate and reconfigure algorithms to pursue their objectives in three domains of everyday life gig work cultural industries and politics They reveal how forms of algorithmic agency and
