

The Cow Eye Dissection Lab

What are the structures of the mammalian eye and how do they function?

The mammalian eye consists of many specialized cells and tissues that make up several different structures. The structures have certain functions and together, they form images that are interpreted by the brain. In this investigation, you identify the structures of a cow eye and learn their functions.

Materials

- Safety goggles
- Dissection scissors
- Preserved cow's eye
- Dissection tray
- Forceps
- Vinyl or latex gloves

- Dissection probes
- Apron or tee-shirt
- Paper towels
- Plastic trash bag

External features of the eye

A. Locate the cornea, sclera, and optic nerve.

- The white part of the eye, the **sclera**, is a tough, outer covering of the eyeball. The sclera gives the eye its shape and helps to protect the delicate inner parts.
- The blue covering over the front of the eye is the **cornea**. When the cow was alive, the cornea was clear. Together with the lens, the cornea refracts light and helps the eye to focus. The cornea gives a larger contribution to the total refraction than the lens. The curvature of the cornea is fixed while that of the lens is changeable. In your cow's eye, the cornea may be cloudy.
- You may be able to look through the cornea and see the iris, the colored part of the eye, and the pupil, the dark oval in the middle of the iris. At the back of the eye is the **optic nerve**. To see the separate fibers that make up the optic nerve, pinch the nerve with a pair of scissors or your fingers. If you squeeze the optic nerve, you may get some white goop. That is myelin, the fatty layer that surrounds each fiber of the nerve. It is the nerve that transmits visual information from the eye to the brain.

- List two functions of the sclera.

The sclera gives the eye its shape and it also helps to protect the delicate inner parts.

- The cornea covers and helps protect the eye. List two other functions of the cornea.

The cornea refracts light and helps the eye to focus.

- What is the function of the optic nerve?

The nerve transmits visual information from the eye to the brain.

Exercises for the Anatomy & Physiology Laboratory Erin C. Amerman, 2019-02-01 This concise inexpensive black and white manual is appropriate for one or two semester anatomy and physiology laboratory courses It offers a flexible alternative to the larger more expensive laboratory manuals on the market This streamlined manual shares the same innovative activities based approach as its more comprehensive full color counterpart Exploring Anatomy Physiology in the Laboratory 3e *A Laboratory Guide for the Dissection of the Cat* Frederic Poole Gorham, Ralph Winfred Tower, 1895

Anatomy and Physiology Laboratory Textbook Harold J. Benson, Arthur Talaro, Kathleen P. Talaro, Stanley E. Gunstream, 1992-10 This laboratory manual is ideal for introductory two semester anatomy and physiology students This new edition works well with any textbook and includes complete explanations of essential information Clear step by step procedures for each exercise are accompanied by detailed illustrations and labeling exercises The main dissection specimen is the cat **Laboratory Guide to Vertebrate Dissection for Students of Anatomy** Arthur Beeny Appleton, 1929 As its title indicates this is a book for use in a practical comparative anatomy course It is intended for a somewhat unusual class of student and consequently its contents outlook and method of treatment are unlike those of the standard texts in this subject As stated in the preface it is assumed that the student has already done a course in elementary zoology including the usual vertebrate types and has also examined in more detail a mammal Unless this mammal were man a number of comparisons in the book would be missed To obtain full benefit from it the student should obviously have taken the preliminary medical studies including a fair amount of human anatomy This is not meant to imply that the student of advanced zoology cannot get many useful hints and fresh points of view from its pages he undoubtedly can The types treated in a series of regional dissections are the lamprey the dogfish *Squalus Necturus* the lizard and the dog As it is intended for assistance in dissection information regarding osteology and the details of the central nervous system have been purposely omitted and conversely the muscles are treated somewhat more fully than is customary **Laboratory Manual for Anatomy and Physiology, with Fetal Pig Dissections** Patricia J. Donnelly, George A. Wistreich, 1993 *Fundamentals of Anatomy and Physiology* Roberta M. Meehan, 1997-08 Lab courses in the fundamentals of anatomy and physiology This laboratory textbook is written to accompany *Fundamentals of Anatomy and Physiology* Fourth Edition by Frederic Martini It includes 70 exercises exploring the concepts integral to an understanding of anatomy and physiology Ideal for laboratory settings that emphasize hands on learning this manual is organized to provide maximum flexibility Exercises are short enough to be mixed and matched and both cat and fetal pig dissection are included **The Science Teacher's Toolbox** Tara C. Dale, Mandi S. White, 2020-04-28 A winning educational formula of engaging lessons and powerful strategies for science teachers in numerous classroom settings The Teacher's Toolbox series is an innovative research based resource providing teachers with instructional strategies for students of all levels and abilities Each book in the collection focuses on a specific content area Clear concise

Chiasson, Theron Oswald Odlaug, 1995 This extensively updated manual is designed for an elementary course in vertebrate biology and will also complement a variety of courses in general biology zoology or basic anatomy *They Touched My Life* Robert Rose Ph.D., 2000-10-18 Be an elementary teacher In 1958 this was not even a consideration I was going to be a child psychiatrist and novelist I hadn't done any writing during my four years in the U S Air Force but I had functioned as a psychologist social worker At twenty one I had my own office and I was giving marriage counseling to noncommissioned officers and officers who were decades older than I was I had practical experience doing individual and group therapy and even used

psychodrama techniques The psychiatrists I worked with all believed I was a natural therapist and they gave me dozens of books to read we discussed their cases and they wrote recommendations for me for medical school My goals were lofty then reality set in I didnt have the money or grades to become a doctor My bachelors degree in psychology was next to useless A friend suggested I teach while I pursued advanced degrees to become a child psychologist It was a painful compromise I had already given up my dreams of becoming a professional actor or athlete and I would have to be an elementary rather than a high school teacher so I couldnt coach football or track It was like being a dishwasher rather than a restaurant owner There was also the commonly held belief then that a male elementary teacher must be somewhat effeminate if not an outright homosexual Throughout my career people have been surprised disappointed that a man who looks like a light heavyweight boxer could be a teacher of small children Still I had a wife and a child to support so I got a teaching credential I had been bored in school and I was determined to make my classes interesting but I was totally unprepared emotionally educationally or organizationally I was wildly successful only because I was charismatic creative and I truly enjoyed the children The more I realized how much more effective I could be with so many more children every year as a teacher than I could be as a psychologist the more I knew I had stumbled into a great career I had found my calling I could express my artistic self through music art dancing and drama My athletic needs were met by playing with the children while teaching them all the sports I loved I had a captive audience for my need to perform as I read to them dramatically and transmitted my eclectic love of learning I was proficient in many psychological techniques which came in handy as I probed their brains and changed their behaviors I was almost too clinical in the first few years as I secretly tested my children using the ink blot test sentence completion and the TAT ambiguous pictures which I used as means to motivate their writing Later I realized that it was not so much the testing as it was the time I spent individually with children that made the difference I was interested in each of them and they knew it and so they shared their lives inside and outside the school as if I was their therapist Therapists never get the opportunity to see their clients in the environments that are causing their problems I not only saw things through their eyes and the dynamics of their relationships but I was in the position to actually change these by what I did Whether it was as simple as changing their seat or reading group or placing them in allegedly extemporaneous plays to act out feel a role that they needed to experience I made immediate changes in their lives It was then I knew that my often traumatic experiences as a gifted Jewish child alone in hostile schools where I was seen as an evil presence was not unusual It was not religious racial cultural or gender differences alone it was the very structure of the schools that caused the horrific and demeaning situations that almost every child experiences The const
