Report to Collaborators Regional Salinity Laboratory (U.S.),1959 AI for Climate Change and Environmental Sustainability Suneeta Satpathy,Satyasundara Mahapatra,Nidhi Agarwal,Sachi Nandan Mohanty,2024-08-14 This book discusses the adverse effects of climatic changes on our planet It examines AI based tools and technologies and how they can assist in identifying energy emission reductions CO2 removal and support the development of greener transportation networks monitoring deforestation and forecasting extreme weather events AI for Climate Change and Environmental Sustainability identifies and discusses in detail the importance of environmental sustainability based on accomplishment of the UN s 17 Sustainable Developmental Goals SDGs It presents the various AI based possibilities for accelerating international efforts to safeguard the environment and conserve natural resources The authors offer a comprehensive analysis of the emerging field of climate change in relation to Internet of Things artificial intelligence machine learning and deep learning The book discusses AI developments applications and best practices that will help us transition to a low carbon future on both a regional and global scale It provides case studies with analytical results pertinent to climate change and weather prediction and includes chapters with a research oriented approach which can encourage new developments in the field of sustainable climate and green environment The book can be used as a primary textbook for graduate and postgraduate students in technology and science as well as a reference for researchers academics and IT professionals working on climate change and sustainability initiatives Soil Mechanics for Unsaturated Soils Delwyn G. Fredlund,Hendry Rahardjo,1993-09-06 The principles and concepts for unsaturated soils are developed as extensions of saturated soils Addresses problems where soils have a matric suction or where pore water pressure is negative Covers theory measurement and use of the fundamental properties of unsaturated soils permeability shear strength and volume change Includes a significant amount of case studies **Social Change in Village India** Sachchidananda,1988 *Contested Karoo: Interdisciplinary perspectives on change and continuity in South Africa's drylands* Cherryl Walker,M Timm Hoffman,2024-05-15 This inter disciplinary collection explores significant land use changes in South Africa s semi arid Karoo region and their implications for social justice and the environment across different scales It brings together recent scholarship by established and younger researchers in both the social and the natural sciences to examine the ways in which the Karoo is being reconfigured as a new resource frontier and the tensions and contestations that result Along with ongoing mining major investments in astronomy notably the Square Kilometre Array radio telescope in renewable and non renewable sources of energy solar wind potential shale gas mining in biodiversity conservation and commercial game farming are reshaping land use and authority in this vast and long marginalised area While promising significant benefits to society at large these developments are built on older histories of dispossession and extractivism histories that many Karoo residents fear are being reproduced in new forms today Collectively these dynamics place this unique region at the centre of national

and global concerns around climate change the politics of knowledge production the conservation of threatened biodiversity and the meaning and possibility of sustainable development These issues are explored through a series of case studies of selected developments complemented by chapters providing more historical context and general overviews While challenging perceptions of this region as a peripheral wasteland this collection raises conceptual and policy questions that resonate far beyond the Karoo itself It also highlights the importance of interdisciplinary collaboration in research aimed not only at understanding but also at responding appropriately to the mounting challenges of our time

Unsaturated Soil

Mechanics in Engineering Practice Delwyn G. Fredlund, Hendry Rahardjo, Murray D. Fredlund, 2012-07-24 The definitive guide to unsaturated soil from the world's experts on the subject This book builds upon and substantially updates Fredlund and Rahardjo's publication *Soil Mechanics for Unsaturated Soils* the current standard in the field of unsaturated soils It provides readers with more thorough coverage of the state of the art of unsaturated soil behavior and better reflects the manner in which practical unsaturated soil engineering problems are solved Retaining the fundamental physics of unsaturated soil behavior presented in the earlier book this new publication places greater emphasis on the importance of the soil water characteristic curve in solving practical engineering problems as well as the quantification of thermal and moisture boundary conditions based on the use of weather data Topics covered include Theory to Practice of Unsaturated Soil Mechanics Nature and Phase Properties of Unsaturated Soil State Variables for Unsaturated Soils Measurement and Estimation of State Variables Soil Water Characteristic Curves for Unsaturated Soils Ground Surface Moisture Flux Boundary Conditions Theory of Water Flow through Unsaturated Soils Solving Saturated Unsaturated Water Flow Problems Air Flow through Unsaturated Soils Heat Flow Analysis for Unsaturated Soils Shear Strength of Unsaturated Soils Shear Strength Applications in Plastic and Limit Equilibrium Stress Deformation Analysis for Unsaturated Soils Solving Stress Deformation Problems with Unsaturated Soils Compressibility and Pore Pressure Parameters Consolidation and Swelling Processes in Unsaturated Soils Unsaturated Soil Mechanics in Engineering Practice is essential reading for geotechnical engineers civil engineers and undergraduate and graduate level civil engineering students with a focus on soil mechanics

value in his lectures on political economy In a criticism of Adam Smith Mylne interprets use value as prior to exchange value founding it in lawful desires identifiable by a merchant community Mylne's political opinions and activity among local political reformers and literary societies exemplify the Glasgow Whig tradition

Geographic Approaches to Climate Change and Mitigation: Urban and Rural Perspectives (Volume 1) Pir Mohammad, Shahfahad, Jesús Rodrigo

Comino, Abraham R. Matamanda, 2025-10-04 This book provides an exploration of the geographic dimensions of climate change focusing on both urban and rural perspectives By examining the unique challenges and opportunities that arise in different environments it offers a balanced and holistic approach to climate mitigation It demonstrates how geographical analysis may guide and strengthen efforts to mitigate climate change by bringing together a variety of tactics case studies and research findings from around the world The main topics covered include urban planning and climate resilience rural land use and sustainability the role of geographic information systems GIS in climate modeling and the socio economic impacts of climate policies Special emphasis is placed on the interconnectedness of urban and rural ecosystems recognizing that solutions in one domain can have ripple effects in the other For instance the book explores how rural land conservation can support urban carbon sequestration efforts or how sustainable urban design can reduce the pressure on natural rural resources These topics are crucial as the world faces environmental changes Cities are responsible for the majority of global emissions yet rural areas often suffer the consequences of climate impacts Understanding the geographic factors influencing both regions is crucial to developing tailored effective mitigation strategies The book explores the innovative approaches such as the use of nature based solutions in urban areas or regenerative agriculture in rural settings that offer promising routes for sustainable development The problem addressed in this book is the lack of a unified geographic perspective on climate change mitigation By discussing urban and rural strategies it aims to encourage cross disciplinary collaboration and inspire actionable solutions that answer to the needs of diverse communities Climate change is a global issue but its impacts and solutions are deeply localized understanding these geographic issues is essential for policymakers urban planners landscape architects environmental scientists and community leaders Targeted at academics professionals and policymakers involved in climate change urban planning landscape architecture and environmental management this book provides readers with the insights needed to create impactful location specific strategies for a more resilient and sustainable future

Transactions of the ASAE. American Society of Agricultural Engineers, 1993 **Fundamentals of Irrigation and On-farm Water Management: Volume 1** Hossain Ali, 2010-09-08 Agriculture is one of the few industries that has been

creating resources continuously from nature Sustainability of this industry is a crucial issue at now a days Agricultural technologies are important to feed the growing world population Agricultural engineering has been applying scientific principles for the optimal use of natural resources in agricultural production for the benefit of humankind The role of agricultural engineering is increasing in the coming days at the forthcoming challenges of producing more food with less

water coupled with climate uncertainty I am happy to know that a book entitled Fundamentals of Irrigation and On farm Water Management written by Engr Dr M H Ali is going to be published by Springer The book is designed to cover the major fields of agricultural and environmental engineering such as weather plant soil water and basics of on farm water management The book will be quite useful for the students of agricultural engineering Students of other related branches of engineering sciences and engineers working in the field and at research institutes will also be benefited The book may serve as a text book for the students and as a practical hand book for the practitioners and researchers in the field of irrigation and on farm water management Utilization of the recent literature in the area and citation of relevant journals reports have added a special value to this book Considering the topics covered engineers scientists practitioners and educators will find this book as a valuable resource
