16 Intake Baragwanth:

Baragwanath Hospital, Soweto Simonne Horwitz, 2013-09-01 Baragwanath Hospital Soweto illustrates how this rapidly growing underfunded but surprisingly effective institution found the niche that allowed it to exist to provide medical care to a massive patient body and at times even to flourish in the apartheid state The book offers new ways of exploring the history of apartheid apartheid medicine and health care The long history of Chris Hani Baragwanath Hospital its full current name or Bara as it is popularly known has been shaped by a complex set of conditions Established in the early 1940s Bara stands on land purchased by the Cornish immigrant John Albert Baragwanath in the late nineteenth century He set up a refreshment post trading store and hotel on the site in what is now Soweto which was a one day journey by ox wagon from Johannesburg The hotel became affectionately known as Baragwanath Place the surname is Welsh from bara meaning bread and gwenith meaning wheat The land was then bought by Corner House Mining Group and later taken over by Crown Mines Ltd but was never mined The British government bought the land in the early 1940s to build a military hospital but by 1947 Baragwanath ceased to operate as a military hospital and under the auspices of the Transvaal Provincial Administration a civilian hospital was opened with 480 beds Patients were transferred from the non European wing of the Johannesburg General Hospital in the white area of Johannesburg Links were immediately forged with the University of the Witwatersrand and Bara would over time become one of its largest teaching centres This link brought medical students and their teachers into direct contact with apartheid in the medical sphere This book will contribute to studies of the history of apartheid that have begun to provide a more nuanced account of its workings The history of Baragwanath and of the doctors and nurses who worked there tells us much about apartheid ideology and practice as well as resistance to it in the realm of health care Engineering and Contracting ,1910 Engineering-contracting ,1910 **Digestion** ,1982 *Asher's Anthology* Asher Dubb,2004 **Adler Museum Bulletin** ,1998 **Handbook of Mechanical and Electrical Cost Data** Halbert Powers Gillette,Richard Turner Dana,1918 **Government Annual Report of the Republic of Venda** Venda (South Africa),1982 *South African Journal of Surgery* ,1994 Annual report - South African Institute for Medical Research South African Institute for Medical Research,1973 **Gastroenterology Abstracts and Citations** ,1973 Cumulated Index Medicus ,1995 **Index Medicus** ,2002 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings **Social and Economic Update** ,1988 **National Library of Medicine Audiovisuals Catalog** National Library of Medicine (U.S.),1989 *Diverticular Bowel Disease - Diagnosis and Treatment* Luis Rodrigo,2024-02-07 Diverticulosis refers to an outpouching of colonic mucosa and submucosa outside of the intestinal lumen It commonly occurs around the penetrating blood vessels It can occur in any segment of the bowels however the sigmoid colon is the most affected segment Diverticulosis the presence of diverticula in the colon remains asymptomatic in most individuals but approximately 25% of people with diverticulosis will experience symptomatic diverticulosis which is referred to as diverticular disease In the past two decades diverticular disease has

become one of the most commonly diagnosed bowel disorders It is seen across the globe and its incidence is high especially in Western countries It is estimated that in many developed countries around 50% of the population older than 50 years is affected by diverticular disease It was once believed to be associated with increasing age however in recent studies its prevalence in younger populations has increased In about 10% 25% of patients with diverticulosis the disease progresses and leads to diverticulitis Many theories have been suggested for the different etiologies of diverticular disease and the most common cause is believed to be a low fiber diet It is believed that diets low in fiber are associated with increased intracolonic pressure which leads to diverticula formation Diverticular disease can have variable clinical presentations Most often it presents as abdominal pain or change in bowel habits and rectal bleeding Its clinical picture can at times mimic inflammatory bowel disease or bowel malignancy Its common sequelae include diverticulitis perforation and peri colic abscess phlegmon The complications of diverticular disease include abscess fistula and bowel strictures Small or localized collections can be managed with intravenous antibiotics and depending on the available resources intervention radiology can also be used to manage such cases CT scan is considered a more specific technique for diagnosis It can also be used for reviewing the patient's progress to treatment with serial scans over time It is also used for treating some complications such as performing percutaneous drainage of abdominal abscesses
