Do not install water pickup directly in line with propeller, as pickup may create turbulence and allow air to flow into the "propeller slipstream." This will cause propeller ventilation and will ultimately affect boat performance.

A pump-in bow pull-type water pickup must be used with bow stern drive. Stern pickup must be large enough to permit sufficient water flow to engine and water pickup pump. An additional engine cooling pickup may be installed as a positive head water source. We recommend Quicksilver Tilt-Bow Water Intake Filling or Transom Mounted Water Pickup.
