designers By focusing on the activity of design the pedagogical approach adopted by the book is based on the view that the best way to learn about the subject is to do it to be creative not to prepare for the ubiquitous examination paper The content of the book and the associated exercises are typically used to support five creative design exercises the final one being a group project mirroring the activity of a consultancy undertaking a design not an implementation for a client Engagement with the material of this book can have a variety of outcomes The composer of a school newsletter and the applicant for a multi million investment should both be able to convey their message more effectively and the curator of an exhibition will have new presentational techniques on their palette For those students training to be visual interaction designers the exercises have led to original and stimulating outcomes
