Community Participation in School Management Kazuro Shibuya, 2022-09-12 Nobody denies that trust in schools is key to success in generating any educational outcomes However trust is often eroded resulting in conflicts alienation and differentiation among school level stakeholders This book analyses school based management SBM of education through the lens of relational trust in the context of Ghana revealing how community participation in school management leads to educational outcomes Conducting quantitative analysis of headteacher questionnaires from public basic schools and qualitative analysis of case study schools in the Akatsi South District of Ghana Shibuya offers critical insights into building sustainable relationships between individual households and geographical school communities He argues it is critical to highlight relational trust as an analytical tool to examine relationships between actors and factors in school management The research finds that trust in schools is a two way mechanism and the mutuality of expectations and obligations among stakeholders is essential if children's learning outcomes are to improve With its mixed methods approach this book will be a valuable resource for scholars in comparative education those in educational development and those interested in African contexts

Les rapports successifs du GIEC soulignent rugueusement les conséquences dommageables de l'activité humaine sur le climat. Une transition écologique paraît indispensable pour modifier notre système économique et social tout en répondant aux besoins des générations actuelles et futures. Premièrement, responsables des dégâts environnementaux, les entreprises doivent modifier leur mode de production pour réduire leurs impacts négatifs sur l'environnement. L'éco-conception et la transition écologique présente une réflexion originale sur l'éco-conception, une méthode visant à proposer des produits ou des services ayant un impact environnemental réduit par rapport au mode de production conventionnel et à celle de l'extraction des ressources à la fin de vie des produits. Cet ouvrage analyse également les perspectives proposées par l'économie circulaire et l'innovation frugale. Il montre alors que l'innovation pour être durable doit être environnementale et sociale. Dans une vision systémique, il étudie ainsi la capacité des acteurs, notamment les entreprises, à changer de stratégie pour allier bien-être humain et respect de l'environnement dans le contexte de la transition écologique.
