Punishing Putin Stephanie Baker,2024-09-10 An in depth authoritative and timely look at the unprecedented economic war the US and its European allies are waging against Russia after Putin s invasion of Ukraine written by a veteran journalist with unparalleled access to Western and Russian sources Undeterred by eight years of timid US sanctions Vladimir Putin ordered his full scale assault on Ukraine on February 24 2022 In the hours that followed across the world Western leaders weaponized economic tools to counter an unprecedented land grab by a nuclear armed power What followed was an undeniably world changing financial experiment

that risked throwing the world into a devastating recession The end goal was simple to sap the strength of Putin's war machine and damage the Russian economy once the eleventh largest on the planet Here Russian expert and veteran journalist Stephanie Baker explains in fascinating detail how this furious shadow war unfolded its causes how it is being executed and its ability to affect Russia and the course of history From seizing superyachts to manipulating the global price of oil to trying to block the sale of military technology to Russia we learn how the White House coordinated with top officials in London and Brussels to freeze a staggering 300 billion in foreign currency reserves accumulated in the West by Russia's central bank Mobilizing an army of white collar crime investigators and experts on international law Baker explores how the West has cracked down on illicit Russian money by targeting oligarchs one superyacht at a time and their enablers around the world Filled with propulsive fly on the wall details Punishing Putin takes us into the frantic backroom deliberations that led to a whole new era of carefully calculated economic statecraft and shows how these new strategies are already radically rearranging global alliances that will influence the world order today and for generations to come

Reproducing Revolution Jenny Hedström, 2025-07-15 In *Reproducing Revolution* Jenny Hedström explores the Kachin revolution in Myanmar from the perspective of female soldiers female activists and women displaced by the violence in northern Myanmar Hedström argues that the household is an inherently gendered militarized and political space that impacts and is in turn impacted by the external conflict with which it coexists In this context women's everyday labor the gendered work of childcare farming fighting and forging connections both across households and between the household and the army and the nation is key to revolutionary survival Hedström calls this labor militarized social reproduction and in *Reproducing Revolution* she demonstrates that such labor is critical to the military effort and that warfare itself is shaped through everyday domestic action

So You Want to Own Greenland? Elizabeth Burchanan, 2025-09-04 An indispensable guide to Greenland why it matters who covets it and why this wilderness of 56 000 inhabitants could become the next global flashpoint Greenland is no ordinary island From its discovery by Norsemen to its contemporary strategic significance it has been a frontier for human exploration and empire today emerging as a facilitator of geoeconomic competition This book delves into the rich history and complex politics of Greenland revealing how this icy expanse has shaped and been shaped by the world This short history begins with the Vikings whose mysterious disappearance from Greenland in the 1400s remains one of history's great puzzles It then explores the island's gradual transformation from a Danish possession to an autonomous territory charting its role during the World Wars and its strategic importance during the Cold War Greenland finds itself at the centre of a renewed great game balancing transatlantic ties rising Chinese influence and mounting domestic pressures for independence And that's before President Trump's agenda is factored in Starting from Trump's plan to purchase Greenland Elizabeth Buchanan dissects the island's contemporary role and poses four provocative scenarios for its future from full independence to an icy geopolitical standoff with Denmark *So You Want to Own Greenland* is an essential read for anyone curious about the future of

this frozen frontier and its place on the global stage *Controllable Artificial Intelligence and the Future of Law* Hugo Luz dos Santos, 2025-11-08 This book broaches the newly crafted concept of algorithmic dictatorship that draws on a plethora of human biases that creep into the algorithm and feeds into an automated decision that comes to the expense of citizens' lives, freedoms, health, property, fair lending, and credit scoring. This book sheds a keen light on the slew of reasons in view of which artificial intelligence should be both interpretable and controllable as opposed to merely explainable. The reason for that is straightforward: the skewed data baked into the bigoted algorithms' machine biases spawns harrowing effects with which criminal justice has been grappling for a long haul. Drawn out tallyingly and perhaps unsurprisingly, law enforcement evinces biases that run along both gender and race lines. No surprise springs from the fact that computer-generated algorithms that propel predictive policing are often flagged as tools whereby racial discrimination abounds. It should not therefore be pegged as flabbergasting that this sort of shady algorithmic governance is a byproduct of a grueling algorithmic dictatorship that is shaping up to crumble the foundations of Rule of Law upon which stands modern societies. This is one of the key takeaways of this book. Disturbingly enough, brain-computer interfaces are poised to be converted into shady tools to collate, gauge, thoughts, emotions, sentiments, and crime-related information that would be otherwise inaccessible to the governments, rogue nations, or unscrupulous actors' prying eyes. Much to our dismay, an eerily dystopian world is unfolding before our very eyes. This is the gist of transhumanism, a byproduct of convolutional neural networks that revolve around deep learning genetic algorithms that will overhaul the current legal landscape beyond recognition. This book charts the path ahead as to draw set in stone boundaries to prevent jurisdictions from careening into the chaos of genetic plutocracy that should be wished away.

Pax Americana Jacqueline S. Ismael, Tareq Y. Ismael, Leslie T. MacDonald, 2024-07-10 This book surveys the testimony of international organizations of the impact of American foreign policy on Iraq. Each reveals a fragment of Iraq's mosaic of misery and desolation but lacks the context to permit our understanding why this has happened. A parallel lack of context characterizes most of the political commentary overlooking the recurring pattern of victimization of Iraqis regardless of which political party controls the White House. This book takes a broader perspective to reveal the enduring pattern linking specific events. *The Measure of Economies* Marshall B. Reinsdorf, Louise Sheiner, 2024-12-16 Innovative new approaches for improving GDP measurement to better gauge economic productivity. Official measures of gross domestic product (GDP) indicate that productivity growth has declined in the United States over the last two decades. This has led to calls for policy changes from pro-business tax reform to stronger antitrust measures. But are our twentieth-century economic methods actually measuring our twenty-first-century productivity? *The Measure of Economies* offers a synthesis of the state of knowledge in productivity measurement at a time when many question the accuracy and scope of GDP. With chapters authored by leading economic experts on topics such as the digital economy, health care, and the environment, it highlights the inadequacies of current practices and discusses cutting-edge alternatives. Pragmatic and forward-facing, *The Measure of*

Economies is an essential resource not only for social scientists but also for policymakers and business leaders seeking to understand the complexities of economic growth in a time of rapidly evolving technology **Whose visions for what learning?** Bray, Mark, UNESCO, 2025-07-11 Royal Histories Joel Z. Garrod, 2025-02-28 The aftermath of the 2008 financial crisis produced diverse solutions from nationalizing banks to increasing government spending and taxing capital. However, these proposals all faced significant obstacles in being realized. Industry lobbying has since weakened reforms leading to ineffective policies raising the larger question of how to understand our current period of globalization where older strategies are ineffective but new solutions seem unattainable. In Royal Histories Joel Z. Garrod presents a historical analysis of the Royal Bank of Canada illustrating how Canadian capitalism and the Canadian banking industry have transformed as they have consolidated nationally and expanded abroad. Emphasizing how national institutions and rules are increasingly becoming capabilities for transnational forms of capital accumulation, the book draws on extensive primary and secondary sources to document the transformation of the assemblage of territory, authority, and rights that have supported the bank's activities over time. Linking the bank's history to the policy regimes of the welfare state and neoliberalism, Garrod contends that our present period of globalization is constituted by a novel organizing dynamic that severely limits the extent to which nation states can absorb capitalist crises or be a site of successful social reform. Connecting the Canadian experience to the wider transformation of global capitalism, Royal Histories illuminates the effects of globalization and the changing landscape of banking and finance. **Autocracy 2.0** Jennifer Lind, 2025-11-15 In Autocracy 2.0 Jennifer Lind reveals how China's leaders defied expectations and propelled the country to innovation superpower status and what that means for the balance of power and global struggle between democracy and authoritarianism. In 2008 the world watched in awe as 2,008 men pounded Fou drums in unison at the Beijing Olympics opening ceremony, a spectacle that heralded China's arrival as a global powerhouse. Yet even as China's economy skyrocketed, skeptics scoffed at its ability to lead in tech, arguing that its authoritarian institutions smother true innovation. Lind dismantles this assumption, showing that China has not just kept pace; it has in fact surged ahead. Coupling hard data with razor-sharp analysis, Lind shows that China's ascent was fueled by what she calls smart authoritarianism: a model of governance in which autocratic leaders temper tight political control with inclusive economic measures. By balancing proinnovation policies with tools of repression, China's leaders have obtained political control and economic growth. These smart authoritarians, Lind observes, are not the brass-knuckled dictators of the past; they are their polished Savile Row-clad progeny, and they are found not only in China but also in authoritarian regimes worldwide. Compelling and incisive, Autocracy 2.0 is a must-read for anyone seeking to understand China's meteoric rise and how today's autocrats are reshaping the technological frontier, governance, and the global balance of power. The Rise and Fall of Civic Education Michael Learn,2024-09-16 Social studies is a field in crisis The crisis stems from failure to establish the very foundation of social studies purpose in public education civic education Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education This issue has disrupted the field since the early days As educators sought to include civic education within public schools as a dedicated field social studies evolved into a blending of history social sciences and civic education Social studies evolution never resolved the differences between the three with each discipline striving to control the narrative Instead of creating a unified field the disciplines devalued social studies and thus any discipline associated with it *The Rise and Fall of Civic Education The Battle for Social Studies in a Shifting Historical Landscape* investigates the changing definitions and purposes ascribed to social
