Kidd,Joseph T. Thomas

Jr.,2016-11-10 Children's book awards have mushroomed since the early twentieth century and especially since the 1960s when literary prizing became a favored strategy for both commercial promotion and canon making. There are over 300 awards for English language titles alone but despite the profound impact of children's book awards scholars have paid relatively little attention to them. This book is the first scholarly volume devoted to the analysis of Anglophone children's book awards in historical and cultural context. With attention to both political and aesthetic concerns the book offers original and diverse scholarship on prizing practices and their consequences in Australia, Canada and especially the United States. Contributors offer both case studies of particular awards and analysis of broader trends in literary evaluation and elevation drawing on theoretical work on canonization and cultural capital. Sections interrogate the complex and often unconscious ideological work of prizing the ongoing tension between formalist awards and so-called identity-based awards all the more urgent in light of the We Need Diverse Books campaign the ever-morphing forms and parameters of prizing and scholarly practices of prizing. Among the many awards discussed are the Pura Belpr Medal the Inky Awards the Canada Governor General Literary Award the Printz Award the Best Animated Feature Oscar the Phoenix Award and the John Newbery Medal giving due attention to prizes for fiction as well as for non-fiction poetry and film. This volume will interest scholars in literary and cultural studies social history book history sociology education library and information science and anyone concerned with children's literature.

Ulrich's International Periodicals Directory Carolyn Farquhar Ulrich,1993 **FCC Record** United States. Federal Communications Commission,2014-10 Cyber Conflicts and Small States Lech J.

Janczewski,William Caelli,2016-09-17 The probability of a world-wide cyber conflict is small. Yet the probability of forms of cyber conflict regional or even global could be argued as being very high. Small countries are usually signatories to military and economic alliances with major world powers but rely heavily on the technical ability of these powers in protecting their own national interests. They may be considered to be IT technology colonies. Their cyber infrastructure is usually fully imported and their ability to assess it is limited. This book poses the question to what extent should or can a small country prepare itself for handling the broad range of cyber threats. Looking at cyber warfare cyber terrorism cyber crime and associated concerns national experts from New Zealand Australia The Netherlands and Poland present analyses of cyber defence realities priorities and options for smaller countries. They show that what is needed is the ability of small nations to be able to define and prepare appropriate responses such as the role of military law enforcement business entities continuity and resilience strategies incident response and business continuity plans and more for handling nationally aimed cyber attacks particularly where these address national critical infrastructures.
