Ann Nersing For 2016:

Clinical Research Transformed Olli S. Miettinen, Johann Steurer, Albert Hofman, 2019-10-15 In this Information Age the practices of clinical medicine should no longer be based on what clinical doctors actively know Rather all of the importantly practice relevant knowledge should not only already exist but also be codified in cyberspace in directly practice guiding expert systems for the benefit of both doctors and patients everywhere Each of these systems discipline specific would prompted by a particular type of case presentation present the doctor a questionnaire specific to cases of the type at issue and document the doctor s answers to the questions If at issue would be a case of complaint about a particular type of sickness the system would translate the resulting diagnostic profile of the case into the corresponding probabilities of the illnesses to be considered Similarly if at issue would be an already diagnosed case of a particular illness the system would ask about and record the relevant elements in the prognostic profile of the case and then translate this profile into the probabilities of various outcomes to be considered probabilities specific to the choice of treatment and prospective time in addition to that profile And besides these systems would analogously address the causal origin etiogenesis of cases of particular types of illness While the requisite knowledge base for these systems notably for the probabilities in them has not been addressed by such patient oriented clinical research as has been conducted very extensively up to now this book delineates the nature of the suitably transformed research gnostic The critically transformative innovation in the research is the studies focus on Gnostic Probability Functions dia etio and prognostic in the framework of logistic regression models This book also presents a vision of how this critically transformative research would most expeditiously be provided for and also conducted among select sets of academic teaching hospitals

Eric J. Kyle, 2019-05-16 This book is an attempt to address two struggles for theistic educators e g those who approach their educational vocation from a religious perspective whether they are working in secular or faith based institutions The first struggle is that while numerous guidelines on teaching excellence have been compiled the resulting checklists can contain more than a hundred criteria to consider This book therefore identifies the evidence based guidelines that are likely to have the highest impact on student achievement thereby empowering educators to focus their efforts in more substantial ways The second struggle is related to the lack of resources which can help educators to view and approach their vocation from a

theistic perspective While there are texts that discuss the relationship of spirituality and or theology to education few to date have sought to bring evidence based educational literature into dialogue with the western Christian tradition and thereby develop a bottom up theology of education This book addresses this historical and theological gap Overall this book is therefore intended to not only provide theistic educators with high impact guidelines that can significantly improve the quality of education in their school systems but it also strives to do so from a thoroughly theistic perspective
