Anne Hidalgo Maire De Paris:

Journal de la campagne d'Anne Hidalgo Claude Estier, 2014-04-18 **The New Heretics of France** Susan Palmer, 2011-09-30 Since the Age of Enlightenment France has upheld clear constitutional guidelines that protect human rights and religious freedom Today however intolerant attitudes and discriminatory practices towards unconventional faiths have become acceptable and even institutionalized in public life Susan Palmer offers an insightful examination of France's most stigmatized new religions or sectes and the public management of religious and philosophical minorities by the state The New Heretics of France tracks the mounting government sponsored anti cult movement in the wake of the shocking mass suicides of the Solar Temple in 1994 an event that ushered France's most visible religious minorities onto a blacklist of 172 sectes commissioned by the National Assembly Drawing on extensive interviews and field research Palmer describes the controversial histories of well known international New Religious Movements including the Church of Scientology Raelian Movement and Unificationism as well as esoteric local groups Palmer also reveals the partisanship of Catholic priests journalists village mayors and the passive public who support La République's efforts to control minority faiths all in the name of Liberty Equality and Fraternity Through historical and sociological theory Palmer analyzes France's war on sectes as a strategic response to social pressures arising from globalization and immigration Her study addresses the impact of these social pressures on traditional cultures and national character as well as important issues of religious freedom and public tolerance The Routledge Handbook of Architecture, Urban Space and Politics, Volume I Nikolina Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the

reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license
