Annihilation A Novel The Southern Reach Trilogy 1:

A History of the Literature of the U.S. South: Volume 1 Harilaos Stecopoulos, 2021-05-05 A History of the Literature of the U S South provides scholars with a dynamic and heterogeneous examination of southern writing from John Smith to Natasha Trethewey Eschewing a master narrative limited to predictable authors and titles the anthology adopts a variegated approach that emphasizes the cultural and political tensions crucial to the making of this regional literature Certain chapters focus on major white writers e g Thomas Jefferson William Faulkner the Agrarians Cormac McCarthy but a substantial portion of the work foregrounds the achievements of African American writers like Frederick Douglass Zora Neale Hurston and Sarah Wright to address the multiracial and transnational dimensions of this literary formation Theoretically informed and historically aware the volume s contributors collectively demonstrate how southern literature constitutes an aesthetic cultural and political field that richly repays examination from a variety of critical perspectives **The American Climate**

Emergency Narrative Johan Höglund, 2024-07-19 The American Climate Emergency Narrative reveals how much of what has been called climate fiction casts ecological breakdown as an emergency for American capitalist modernity rather than for the planet The book traces the origins of this narrative back to the arrival of settler capitalism in America when the understanding of the planet and its people as extractable resources was established Since then this narrative has elided the violent history of the climate crisis while at the same time leveraging the military as a bulwark against the crises capitalism has caused the people it has uprooted even the ailing planet itself This is an open access book **The Cambridge**

Companion to Environmental Humanities Jeffrey Cohen, Stephanie Foote, 2021-09-02 Offers a comprehensive introduction to the environmental humanities It addresses the 21st century recognition of an environmental crisis

Science Fiction beyond Borders Shawn Edrei, Danielle Gurevitch, 2016-12-14 Since the turn of the previous century science fiction and its native tropes have been used by authors artists filmmakers and critics in order to challenge boundaries whether these be conceptual literary or metaphorical Uniquely inherent to the genre is its ability to explore as a form of thought experiment different ways of crossing and subverting borders previously thought to be inviolable these

transgressions and their effects on popular culture have in turn led to an increased presence of science fiction studies in academia This volume features papers presented at the 2014 and 2015 Science Fiction Symposia held at Tel Aviv University These essays submitted by an eclectic mix of scholars from different disciplines institutes and walks of life demonstrate the diversity and adaptability of science fiction as a tool for asking and answering impossible questions *Surreal*

Entanglements Louise Economides, Laura Shackelford, 2021-05-18 This edited collection approaches the most pressing discourses of the Anthropocene and posthumanist culture through the surreal yet instructive lens of Jeff VanderMeer's fiction In contrast to universalist and essentializing ways of responding to new material realities VanderMeer's work invites us to re-imagine human subjectivity and other collectivities in the light of historically unique entanglements we face today the ecological technological aesthetic epistemological and political challenges of life in the Anthropocene era Situating these messy multi-scalar material complexities of life in close relation to their ecological material and colonialist histories his fiction renders them at once troublingly familiar and strangely generative of other potentialities and insight The collection measures VanderMeer's work as a new kind of speculative surrealism his texts capturing the strangeness of navigating a world in which nature has become radically uncanny due to global climate change and powerful bio-technologies The first collection to survey academic engagements with VanderMeer this book brings together scholars in the fields of environmental literature science fiction genre studies American literary history philosophy of technology and digital cultures to reflect on the environmentally culturally aesthetically and politically central questions his fiction poses to predominant understandings of the Anthropocene **New Weird Fiction and the Anthropocene** Trang Dang, 2025-07-24 This book

explores the development of ecological awareness in Jeff VanderMeer's New Weird novels focusing specifically on the Southern Reach 2014 2024 and Borne 2017 2019 series Examining the New Weird genre as an understudied part of climate fiction the chapters investigate how these texts language content and form develop unique and fascinating ways in which one can think and live more ecologically As the first book-length study on VanderMeer's work to contextualize his novels through object-oriented ontology OOO an emerging branch of speculative philosophy that investigates how things exist this work enables a uniquely experimental reading of VanderMeer one that accentuates how his work unsettles what is perceived as normal and exposes the bounds of human reasoning as well as how we understand ourselves and our relationships with nonhumans Dang also engages with interdisciplinarity situating VanderMeer's work within cultural discourse around the Anthropocene environmental anthropology prehistoric archeology evolutionary biology and Indigenous studies **Other**
