This focus not only highlights how narrative techniques often rely on everyday language conventions but also explores how various textual features narrative devices or even entire storylines can be affected by phenomena or lead to experiences of ambiguity These ambiguities often serve as poetic strategies that are deliberately set in the communicative process of text and reader to achieve certain narrative goals Secondly ambiguity as a characteristic of narrative communication serves as a linking element across different fictional and factual text types and genres throughout time and cultures The collected essays cover a wide range of narrative texts from Roman comedy to funerary reliefs from historiographical writings to utopian tales from Goethe's novels to contemporary fantasy literature In its broad approach the volume thus contributes to the project of diachronic narratology which like the research on ambiguity in literary and cultural studies has recently gained increasing momentum The combined consideration of ambiguity and narratology not only raises awareness of phenomena of ambiguity in narrative texts but also encourage reflection on the theoretical foundations of narrative particularly on the methods and devices used to describe these ambiguous structures Overall the volume represents an exploration of a relatively unexplored interdisciplinary field aiming to stimulate further research
