Ethylene: A Key Regulatory Molecule in Plants Nafees A. Khan, M. Iqbal R. Khan, Antonio Ferrante, Péter Poór, 2017-12-21 Ethylene is a simple gaseous phytohormone with multiple roles in regulation of metabolism at cellular molecular and whole plant level It influences performance of plants under optimal and stressful environments by interacting with other signaling molecules Understanding the ethylene biosynthesis and action through the plant's life can contribute to improve the knowledge of plant functionality and use of this plant

hormone may drive adaptation and defense of plants from the adverse environmental conditions The action of ethylene depends on its concentration in cell and the sensitivity of plants to the hormone In recent years research on ethylene has been focused due to its dual action on the regulation of plant processes at physiological and molecular level The involvement of ethylene in the regulation of transcription needs to be widely explored involving the interaction with other key molecular regulators The aim of the current research topic was to explore and update our understanding on its regulatory role in plant developmental mechanisms at cellular or whole plant level under optimal and changing environmental conditions The present edited volume includes original research papers and review articles describing ethylene s regulatory role in plant development during plant ontogeny and also explains how it interacts with biotic and abiotic stress factors This comprehensive collection of researches provide evidence that ethylene is essential in different physiological processes and does not always work alone but in coordinated manner with other plant hormones This research topic is also a source of tips for further works that should be addressed for the biology and molecular effects on plants

Active Learning in College Science Joel J. Mintzes, Emily M. Walter, 2020-02-23 This book explores evidence based practice in college science teaching It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman s 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching In editing this book we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines Our intention is to let these distinguished scientists speak for themselves and to offer authentic guidance to those who seek models of excellence Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges 4 year liberal arts institutions comprehensive regional campuses and flagship research universities In keeping with Wieman s challenge our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences The content is structured as follows after an Introduction based on Constructivist Learning Theory Section I the practices we explore are Eliciting Ideas and Encouraging Reflection Section II Using Clickers to Engage Students Section III Supporting Peer Interaction through Small Group Activities Section IV Restructuring Curriculum and Instruction Section V Rethinking the Physical Environment Section VI Enhancing Understanding with Technology Section VII and Assessing Understanding Section VIII The book s final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years In this view learners make sense of the world by forging connections between new ideas and those that are part of their existing

knowledge base For most students that knowledge base is riddled with a host of naive notions misconceptions and alternative conceptions they have acquired throughout their lives To a considerable extent the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view to assist as students restructure and reconcile their newly acquired knowledge and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for General Science & Technology for Civil Services PT & Mains, State PSC, CDS, NDA, SSC, & other UPSC Exams 2nd Edition Disha Experts, 2019-03-26 The thoroughly Revised Update 2nd Edition of the book General Science Technology for Civil Services PT Mains State PSC CDS NDA SSC other UPSC Exams been designed with special focus on IAS Prelims Main Exams The book is prepared as per the trend of questions asked in previous years question papers of various UPSC State PSC SSC exams In nutshell the book consists of complete theory of Physics Chemistry Biology and Technology with MCQ Exercise including past questions of various exams The book also covers past questions of IAS Mains GS III and various State PSC exams The book also covers Technology in the development of India and its future prospects in the field of research The part deals with Energy Nuclear Technology Information Technology Space research Communication and Defence The book is empowered with a variety of questions Simple MCQs Statement Based MCQs Match the column MCQs Assertion Reason MCQs and thus more than 3800 questions are included in the book Solutions are also provided in the book Past MCQs of last ten year questions of various competitive exams have also been included in the book

Proceedings of The 14th IAC 2019 group of authors, 2019-04-18 EASTER CONFERENCE The 14th International Academic Conference in Prague 2019 Czech Republic The 14th IAC in Prague 2019 Agents and Goals in Evolution Samir Okasha, 2018-06-12 Samir Okasha approaches evolutionary biology from a philosophical perspective in Agents and Goals in Evolution analysing a mode of thinking in biology called agential thinking He considers how the paradigm case involves treating an evolved organism as if it were an agent pursuing a goal such as survival or reproduction and seeing its phenotypic traits as strategies for achieving that goal or furthering its biological interests As agential thinking deliberately transposes a set of concepts goals interests strategies from rational human agents and to the biological world more generally Okasha's enquiry firstly looks at the justification for this is it mere anthropomorphism or does it play a genuine intellectual role in the science From this central question key points are considered such as how do we identify the goal that evolved organisms will behave as if they are trying to achieve Can agential thinking ever be applied to groups rather than to individual organisms And how does agential thinking relate to the controversies over fitness maximization in evolutionary biology In addition Okasha examines the relation between the adaptive and the rational by considering whether organisms can validly be treated as agent like Should we expect their evolved behaviour to correspond with that of rational agents as codified in the theory of rational choice If so does this mean that the fitness maximizing paradigm of the evolutionary

biologist can be mapped directly to the utility maximizing paradigm of the rational choice theorist All of these important questions are engagingly raised and discussed at length

Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set) Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events

Trends in Teaching Experimentation in the Life Sciences Nancy J. Pelaez, Stephanie M. Gardner, Trevor R. Anderson, 2022-05-11 This book is a guide for educators on how to develop and evaluate evidence based strategies for teaching biological experimentation to thereby improve existing and develop new curricula It unveils the flawed assumptions made at the classroom department and institutional level about what students are learning and what help they might need to develop competence in biological experimentation Specific case studies illustrate a comprehensive list of key scientific competencies that unpack what it means to be a competent experimental life scientist It includes explicit evidence based guidelines for educators regarding the teaching learning and assessment of biological research competencies The book also provides practical teacher guides and exemplars of assignments and assessments It contains a complete analysis of the variety of tools developed thus far to assess learning in this domain This book contributes to the growth of public understanding of biological issues including scientific literacy and the crucial importance of evidence based decision making around public policy It will be beneficial to life science instructors biology education researchers and science administrators who aim to improve teaching in life science departments Chapters 6 12 14 and 22 are available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

Geoethics for the Future Silvia Peppoloni, Giuseppe Di Capua, 2024-07-13 Geoethics for the Future Facing Global Challenges offers the latest points of view on highly topical issues in geosciences including climate change sustainable development and energy transition enabling readers to acquire multifaceted knowledge of topics of global relevance and highlighting the importance of the issues affecting geosciences in the 21st Century The book outlines how geoethical considerations are integral in providing new insights and analyses for improving the theoretical structure of geoethics and its practical applications with an aim to create conditions for sharing perspectives on the best ways for implementing scientific action to face global anthropogenic changes Covers upcoming and current key topics and emphasizes the urgency to find reference frameworks and effective solutions to the issues associated with them Includes multifaceted analyses on relevant topics by leveraging the cross cutting contributions of experts to address urgent global and complex issues related to human Earth system interaction Provides an indispensable basis for discussion to guide scientists in considering their own responsibilities and to highlight the societal relevance of the geosciences Discusses philosophical ethical social political economic legal and theological aspects of geoscience technological applications and anthropogenic impacts on physical environment through the lens of geoethics in time of profound planetary changes Bridges the geosciences social sciences and humanities aiming to address the socio ecological crisis from multiple perspectives and with greater effectiveness

Reviewing **Answer To 2014 Biology Objectives**: Unlocking the Spellbinding Force of Linguistics

In a fast-paced world fueled by information and interconnectivity, the spellbinding force of linguistics has acquired newfound prominence. Its capacity to evoke emotions, stimulate contemplation, and stimulate metamorphosis is truly astonishing. Within the pages of "**Answer To 2014 Biology Objectives**," an enthralling opus penned by a highly acclaimed wordsmith, readers attempt an immersive expedition to unravel the intricate significance of language and its indelible imprint on our lives. Throughout this assessment, we shall delve in to the book is central motifs, appraise its distinctive narrative style, and gauge its overarching influence on the minds of its readers.
