Handbook of Research on the Role of Human Factors in IT Project Management Misra, Sanjay, Adewumi, Adewole, 2019-09-27 The role humans play in the field of information technology continues to hold relevance even with the industry's rapid growth. People contribute heavily to the physical, cognitive, and organizational domain of computing, yet there is a lack of exploration into this phenomenon. Humanoid aspects of technology require extensive research in order to avoid marginalization and insufficient data. The Handbook of Research on the Role of Human Factors in IT Project Management is a collection of innovative research on the methods and applications of the task of human characteristics in the design and development of new technology. While highlighting topics including digitalization, risk management, and task analysis, this book is ideally designed for IT professionals, managers, support executives, project managers, managing directors, academicians, researchers, and students seeking current research on the dynamics of human influence in technological projects.

Sustainable Development and Social Responsibility—Volume 2 Ahmed N. Al-Masri, Yousef Al-Assaf, 2020-01-13 This book gathers high quality research papers presented at the 2nd AUE international research conference AUEIRC 2018 which was organized by the American University in the Emirates, Dubai, and held on November 13th-15th, 2018. The book is broadly divided into two main sections: Sustainability and Smart Business, and Sustainability and Creative Industries. The broad range of topics covered under these sections includes risk assessment in agriculture, corporate social responsibility, and the role of intermediaries; the impact of privatizing health insurance, political events, and their effect on foreign currency exchange; the effect of sustainable HR practices on financial performance; sustainability integration in the supply chain and logistics; gender inequality in the MENA economies; the panel data model; the model of sustainable marketing in the era of Industry 4.0; micro enterprises as a tool for combating unemployment; the impact of financial education and control on financial behavior; measuring financial and asset performance in agricultural firms; a comprehensive strategic approach to sustainability in the UAE; sustainability and project finance; HR analytics; FaD or fashion for organizational sustainability; a conceptual framework of sustainable competitive advantages; psychology of organizational sustainability; Blockchain technology and sustainability; veganism and sustainability; institution building from an emotional intelligence perspective; sustainable concrete production using CWP; occupants' behavior and energy usage in Emirati houses; the effect of shop lighting on consumer behavior; multimedia applications in digital transformation; art integrating biomimicry principles in sustainable architecture; experimental sustainable practices in fashion education; technology assisted student centered learning for civil engineering; and a 10 step design process for architectural design studios. All contributions present high quality original research work, findings, and lessons learned in practical development.

Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education, the chosen subject for this book.

Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills
