Communication in Organizations Dave Tofanelli, 2012-03-30 The future of business communications is a fully interconnected world where every employee will access create and use content from anywhere At the same time companies want to keep their employees connected anytime or anywhere Employees are no longer tied to their desktops and they want the same communications options on the road or from home that they have in the office Face to face communication is quickly becoming a lost art in this age of e mail texting and voicemail But ultimately when it comes to engaging an audience or making a compelling sales presentation business is still driven by personal communication High technology sets the stage but speaking face to face seals the deal Lack of communicative ability plagues many corporations and the professionals that rise to the top are overwhelming those that develop communication approaches that achieve results But communicating with influence takes work and requires constant attention This text will assist you in understanding types of communication explain how successful communication takes place and suggest ways of improving communication

ECMLG 2017 13th European

Conference on Management, Leadership and Governance Martin Rich, 2017-12-11 These Proceedings represent the work of contributors to the 13th European Conference on Management Leadership and Governance ECMLG 2017 hosted this year by the Cass Business School City University of London on 11-12 December 2017. The Conference Chair is Dr Martin Rich. The conference will be opened with a keynote address by Dr Helen Rothberg from Marist College Poughkeepsie USA with a speech entitled 'Everything I Know about Leadership I Learned as a Bartender'. On the second day the keynote will be delivered by Dr Amanda Goodall from City University of London on the topic of 'Why we need core business experts as leaders'. ECMLG is a well established platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different branches of Management Leadership and Governance. At the same time it provides an important opportunity for members of the community to come together with peers, share knowledge and exchange ideas. With an initial submission of 160 abstracts, after the double blind peer review process there are 61 academic papers: 8 PhD Papers and 2 Work in Progress papers in these Conference Proceedings. These papers reflect the truly global nature of research in the area with contributions from Australia, Austria, Belgium, Brazil, Canada, Czech Republic, Finland, Germany, Hungary, Iran, Ireland, Israel, Kazakhstan, Kenya, Lithuania, Malaysia, Business Leadership Development in China Shuang Ren, Robert Wood, Ying Zhu, 2015-03-24. This book argues that China's businesses and hence China's future economic development face a huge crisis in that there is a considerable leadership gap in China with a shortage of competent business leaders at a time when new leadership skills are required urgently as China's businesses evolve rapidly and engage ever more with the global economy. Moreover, the book argues training is an undervalued and often marginalised activity in Chinese companies. The book outlines the nature of this problem and goes on to demonstrate that there is a new breed of manager emerging in China, aware of the need to upgrade management skills, moving away from skills appropriate in traditional industrial firms and emphasising more flexibility, positive engagement with workers and competence in the market economy. The book includes an evaluation of different management approaches in China, reports on extensive original research including interviews with practising managers and sets out how self-development is widespread, deep and important.

Business Value and Sustainability Ki-Hoon Lee, Stephan Vachon, 2016-08-17. This book connects business sustainability to supply network based value creation and enhancement and tests a number of key propositions in complex supply networks to identify key challenges. Examining practical issues such as carbon trading, green product development, worker safety, child labour and relations with local communities, *Business Value and Sustainability* advances the understanding of sustainability in supply network management. In presenting a supply management perspective including a tighter control of the supply base and the development of supplier capability through collaboration with NGOs, the authors contribute to both the theoretical advancement and practical development of this field. The book aims to raise the sustainability standards of businesses in an increasingly complex and inter and intra connected global supply network.
