Artificial Intelligence System Protein Interaction:

Artificial Intelligence System & Protein Interaction Gautam Kumar, Tapobrata Lahiri, 2014-10-01 Protein protein interaction play a major part in Bioinformatics and Computational Biology to interpret the basic inherent principles of biological organizations Compared to the available protein networks and sequences of dissimilar species the number of exposed PPIs protein protein interactions is still very much confined In this book a sequence based method using the physio chemical properties of protein residues is proposed by blending a new feature representation Auto Covariance AC and Artificial Neural Network ANN Auto Covariance describes for interactions among amino acids residues at some outstrip apart in the primary protein sequence so this method takes the adjacent effect into account for protein interactions The amino acids were changed into numerical values presenting six physico chemical properties after that those numerical sequences were changed to one dimensional vector of same size by AC Finally the ANN model was build using the vectors of Auto Covariance variables as input The experiment demonstrated that the prediction model and the interaction prediction accuracy is higher than 94 0% after 5 fold cross validation Artificial Intelligence: Methodology, Systems, and Applications Christoph Bussler, 2004-08-23 This book constitutes the refereed proceedings of the 11th International Conference on Artificial Intelligence Methodology Systems and Applications AIMSA 2004 held in Varna Bulgaria in September 2004 The 52 revised full papers presented were carefully reviewed and selected from 176 submissions The papers are organized in topical sections on ontology engineering semantic Web services knowledge representation and processing machine learning and data mining natural language processing soft computing neural networks e learning systems multiagent systems pattern recognition intelligent decision making and information retrieval *Artificial Intelligence*, 2023-09-11 Artificial Intelligence Volume 49 in the Handbook of Statistics series highlights new advances in the field with this new volume presenting interesting chapters on a variety of timely topics Chapters in this new release include AI Teacher Student based Adaptive Structural Deep Learning Model and Its Estimating Uncertainty of Image Data Machine derived Intelligence Computations Beyond the Null Hypothesis Object oriented basis of artificial intelligence methodologies I in Judicial Systems in India Artificial Intelligence in Systems Biology Machine Learning in Geometry and Physics Innovation and Machine Learning Crowdsourcing Open Source Natural Language Processing NLP Algorithms to Advance Public Health Surveillance and more Other chapters cover Learning and identity testing of Markov chains Data privacy for machine learning and statistics and The interface between AI and Mathematics Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in the Handbook of Statistics series Includes the latest information on Artificial Intelligence **Artificial Intelligence Methods and Tools for Systems Biology** W. Dubitzky, Francisco Azuaje, 2007-09-29 This book provides simultaneously a design blueprint user guide research agenda and communication platform for current and future developments in artificial intelligence AI approaches to systems biology It places an emphasis

on the molecular dimension of life phenomena and in one chapter on anatomical and functional modeling of the brain As design blueprint the book is intended for scientists and other professionals tasked with developing and using AI technologies in the context of life sciences research As a user guide this volume addresses the requirements of researchers to gain a basic understanding of key AI methodologies for life sciences research Its emphasis is not on an intricate mathematical treatment of the presented AI methodologies Instead it aims at providing the users with a clear understanding and practical know how of the methods As a research agenda the book is intended for computer and life science students teachers researchers and managers who want to understand the state of the art of the presented methodologies and the areas in which gaps in our knowledge demand further research and development Our aim was to maintain the readability and accessibility of a textbook throughout the chapters rather than compiling a mere reference manual The book is also intended as a communication platform seeking to bridge the cultural and technological gap among key systems biology disciplines To support this function contributors have adopted a terminology and approach that appeal to audiences from different backgrounds
