Patent Office, 1893 Business Process Maturity Amy Van Looy, 2014-01-27 Organisations face many challenges which induce them to perform better and thus to establish mature or excellent business processes As they now face globalisation higher competitiveness demanding customers growing IT possibilities compliancy rules etc business process maturity models BPMMs have been introduced to help organisations gradually assess and improve their business processes e g CMMI or OMG BPMM In fact there are now so many BPMMs to choose from that organisations risk selecting one that does not fit their needs or one of substandard quality This book presents a study that distinguishes process management from process orientation so as to arrive at a common understanding It also includes a classification study to identify the capability areas and maturity types of 69 existing BPMMs in order to strengthen the basis of available BPMMs Lastly it presents a selection study to identify criteria for choosing one BPMM from the broad selection which produced a free online selection tool BPMM Smart Selector **Handbook of Geometry and Topology of Singularities I** José Luis Cisneros Molina, Dũng Tráng Lê, José Seade, 2020-10-24 This volume consists of ten articles which provide an in depth and reader friendly survey of some of the foundational aspects of singularity theory Authored by world experts the various contributions deal with both classical material and modern developments covering a wide range of topics which are linked to each other in fundamental ways Singularities are ubiquitous in mathematics and science in general Singularity theory interacts energetically with the rest of mathematics acting as a crucible where different types of mathematical problems interact surprising connections are born and simple questions lead to ideas which resonate in other parts of the subject This is the first volume in a series which aims to provide an accessible account of the state of the art of the subject its frontiers and its interactions with other areas of research The book is addressed to graduate students and newcomers to the theory as well as to specialists who can use it as a guidebook The Jer-Nan Juang Astrodynamics Symposium Manoranjan Majji, John L. Junkins, 2013 Sustainable Resource Development Gary M. Zatzman, 2012-12-10 Taking a fresh new look at the energy industry and how the Earth's resources are being developed the aim of this book is to aid engineers and scientists in attaining sustainability in this field both from an economic and environmental perspective The author herein presents engineering research and practice that is focused on achieving energy sustainability from a global perspective as is also outlined in other Scrivener books such as *The Greening of Petroleum Operations* and the author's own recently published book *Sustainable Energy Pricing* the companion volume to this book The author applies the principles of economic sustainability developed there to re-examine actual engineering practices in fossil fuel and alternative energy such as wind and tidal power exploration and development One of the book's unique features is its analysis of what is deficient in the thinking and analytical frameworks that inform engineering work done in the field The book addresses the complex issues

surrounding our quest for sustainability and the key causes of the challenges that face the energy industry and its resource development From this standpoint the book challenges the reasoning and conclusions drawn from the often quoted theory of peak oil

High-resolution Seafloor Survey and Applications Ziyin Wu,Fanlin Yang,Yong Tang,2020-12-07 This book focuses on the survey technology post processing technology mapping technology and scientific application of the submarine topography and geomorphology in detail High resolution submarine geomorphology is a frontier branch of marine geology and marine surveying and mapping which provides a direct basis to study the seabed surface to understand the tectonic movement and submarine evolution In the past two decades high resolution submarine geomorphology with high precision multi beam echo sounding side scan sonar and sub bottom profiler as the major techniques is developing very quickly and is one of the frontiers of international marine science and technology These high techniques promote the traditional submarine geomorphology to high resolution and quantitative research At present high resolution submarine geomorphology is widely used in the delimitation of the continental shelf the international seabed resources survey marine engineering and marine military applications In order to facilitate readers to understand how to acquire and apply scientific research based on submarine topographic data it highlights the combination of theory technology and scientific application This book is useful as a reference for professional and technical personnel in related fields and also as a textbook for both graduate and undergraduate students as well

Irregular Citizenship, Immigration, and Deportation Peter Nyers,2018-12-14 Deportation has again taken a prominent place within the immigration policies of nation states Irregular Citizenship Immigration and Deportation addresses the social responses to deportation in particular the growing movements against deportation and detention and for freedom of movement and the regularization of status The book brings deportation and anti deportation together with the aim of understanding the political subjects that emerge in this contested field of governance and control freedom and struggle However rather than focusing on the typical subjects of removal refugees the undocumented and irregular migrants Irregular Citizenship Immigration and Deportation looks at the ways that citizens get caught up in the deportation apparatus and must struggle to remain in or return to their country of citizenship The transformation of regular citizens into deportable irregular citizens involves the removal of the rights duties and obligations of citizenship This includes unmaking citizenship through official revocation or denationalization as well as through informal extra legal and unofficial means The book features stories about struggles over removal and return deportation and repatriation rescue and abandonment The book features eleven acts of citizenship that occur in the context of deportation and anti deportation arguing that these struggles for rights recognition and return are fundamentally struggles over political subjectivity of citizenship This book will be of interest to students and scholars of citizenship migration and security studies
