Ancient Mesopotamia Linda Armstrong, 2002-09-01 Color Overheads Included Welcome to ancient Mesopotamia home of the world's first cities This strip of land between the Tigris and Euphrates Rivers is often called the Cradle of Civilization Mesopotamians were among the first to use the wheel and the written word In mathematics they used place value and were comfortable with quadratic equations They had libraries that included everything from recipe books to directions for making glass People still read Gilgamesh their great epic poem The activities in this book provide insight into the history technology laws economy literature and art of ancient Mesopotamia The eight full color transparencies at the back of the book can be used alone or with specific activities listed in the table of contents **Creative Haven Hamsa Designs Coloring Book** Mary Agredo, Javier Agredo, 2014-04-16 The hamsa symbolizes good fortune around the world particularly in the Middle East and North Africa More than 30 lively hamsa designs feature flowers animals stars and other natural figures **Story Of The World Ancient Times Activity Book 1 3e** Susan Wise Bauer, 2006-11 Presents a history of the ancient world from 6000 B C to 400 A D *Sources of Free and Inexpensive Educational Materials* Field Enterprises Educational Corporation, 1958 **Mesopotamian Sculpture in Colour** Astrid Nunn, Heinrich Piening, 2020-12-31 We can now be sure that Mesopotamian sculpture of the human form was typically coloured Our project which set out to reconstruct the polychromy of Mesopotamian stone statues dating from the fourth to the first millennium BCE is a part of a slow shift to incorporate more visual evidence in research about colour and perception in the ancient world that has long been dominated by ethno linguistic studies Our scientifically grounded reconstructions serve as a prelude to a more comprehensive exploration of the materiality and aesthetics of Mesopotamian sculpture which open many windows onto historical cultural and symbolic issues In this study we trace the chronological development of the use of colours and consider why they changed over time The manner in which colours served as social markers of gender ethnicity and class for example are explored from the material culture and textual perspectives When used to describe hair skin and garments Sumerian and Akkadian words for colour denote more than just physical properties They also evoke qualities such as lightness or darkness dullness or glossiness and encode specific symbolic values that impinge on many aspects of society In all cultures the notion of skin colour is subject to social concepts prejudices and ideals and is thus a matter of convention Our discovery that the face and body in particular were so vibrantly coloured provides an entirely new and unexpected view of ancient Near Eastern effigies Through such luminous radiant and lucid colours we are now able to recognise the true faces of the statues and to visualise what was considered beautiful and acceptable to the gods *Identifying the Stones of Classical Hebrew* Ephraim S. Ayil, 2024-08-26 Since the translation of the Septuagint in the 3rd century BCE scholars have attempted to identify the stones that populate the biblical text This study rejects the long standing reliance on ancient translations for identifying biblical stones Despite the evident contradictions and historical inconsistencies scholars traditionally presumed these

translations to be reliable By departing from this approach this volume presents a novel synthesis of comparative linguistics and archeogemological data Through rigorous analysis of valid cognates it establishes correlations between Hebrew stone names and their counterparts in ancient languages corresponding to known mineral species This methodological shift enables a more accurate identification of stones mentioned in biblical texts thus recovering their true historical context The research not only advances our understanding of biblical mineralogy but also provides a fresh perspective on the material culture of the Ancient Levant offering valuable insights for scholars and laymen linguists and archaeologists alike

Empires of Ancient Persia Michael Burgan,Thomas G. Urban,2009 For almost 1 200 years the Persians ruled a territory that stretched from the Black Sea into Central Asia from India to Egypt and into the fringes of southern Europe During that period from 550 BCE to 651 CE the ancient Persians learned to cultivate crops such as wheat and barley and to domesticate animals they also demonstrated their talents for architecture and art by building enormous palaces such as at the site of Persepolis and through intricate art painted on pottery As their neighbors particularly the Macedonian prince Alexander the Great grew stronger ancient Persia struggled to maintain its authority Despite their eventual decline the Persian empires had significant influence on the ancient world including the idea of worshipping a single god As the first monotheistic religion Zoroastrianism would lay the foundation for the development of Christianity Islam and Judaism Empires of Ancient Persia looks at the rise and fall of the Persian empires the daily life of the people and their influence on subsequent civilizations
