Teaching and Learning Mathematics through Variation Rongjin Huang, Yeping Li, 2017-02-06 Efforts to improve mathematics teaching and learning globally have led to the ever increasing interest in searching for alternative and effective instructional approaches from others. Students from East Asia such as China and Japan have consistently outperformed their counterparts in the West. Yet Bianshi Teaching, teaching with variation practice, which has been commonly used in practice in China, has been hardly shared in the mathematics education community internationally. This book is devoted to theorizing the Chinese mathematical teaching practice, Bianshi teaching, that has demonstrated its effectiveness over half a century, examining its systematic use in classroom instruction, textbooks and teacher professional development in China, and showcasing of the adaptation of the variation pedagogy in selected education systems including Israel, Japan, Sweden and the US. This book has made significant contributions to not only developing the theories on teaching and learning mathematics through variation but also providing pathways to putting the variation theory into action in an international context. This book paints a richly detailed and elaborated picture of both teaching mathematics and learning to teach mathematics with variation. Teaching with variation and variation as a theory of learning are brought together to be theorized and exemplified through analysis of teaching in a wide variety of classrooms and targeting both the content and processes of mathematical thinking. Highly recommended. Kaye Stacey, Emeritus Professor of Mathematics Education, University of Melbourne, Australia. Many teachers in England are excited by the concept of teaching with variation and devising variation exercises to support their pupils' mastery of mathematics. However, fully understanding and becoming proficient in its use takes time. This book provides a valuable resource to deepen understanding through the experiences of other teachers shared within the book and the insightful reflections of those who have researched this important area. Debbie Morgan, Director for Primary Mathematics, National Centre for Excellence in the Teaching of Mathematics, United Kingdom.
